Bound set of Getting Started in Boats, from WoodenBoat magazine, issues 1-20. Each issue is 8 pages, with topics like Building the Lumberyard Skiff, to Building the Peace Canoe, Flat bottomed skiffs, strip planking, small boat shapes, annual painting, wood selection, home boatshops, reading boat plans, and more.

Barnaby Lenon, a former schoolmaster and headmaster who is chair of the Independent Schools Council, takes an in-depth look at the elements that make up a successful school, and reports on his fact-finding visits to schools that are achieving outstanding results with disadvantaged pupils.

Used by more than 3.5 million students, The Enjoyment of Music has been the most trusted introduction to music for over five decades. The Tenth Edition reaffirms this status in a thoughtful revision offering a more diverse repertory and a stronger emphasis on the cultural significance of musical styles and periods. Responding directly to the needs of today ' s students, Professor Forney has completely rewritten the chapters on musical elements for accessibility and integrated the textbook material with powerful new multimedia learning tools. These resources—the Student Resource DVD, StudySpace, and the Online Listening Lab—reinforce important concepts from the text through interactive, hands-on learning.

Drawing on their experience as government insiders, the authors of this book show how economic policy is shaped at the highest levels of government. They reveal the interconnections between economic, social and international policy, covering such issues as the advocacy system.

Along the wide waters of eastern North Carolina, the people of many scattered villages separated by creeks, marshes, and rivers depend on shallow-water boats, both for their livelihoods as fishermen and to maintain connections with one another and with the rest of the world. As Lawrence S. Earley discovered, each workboat has stories to tell, of boatbuilders and fishermen, and of family members and past events associated with these boats. The rich history of these hand-built wooden fishing boats, the people who work them, and the communities they serve lies at the heart of Earley's evocative new book of essays, interviews, and photographs. In conversations with the region's fishermen and boatbuilders, the author finds webs of decades-old social history and realizes that workboats are critical in maintaining a community's memories and its very sense of identity. Including nearly 100 of Earley's own striking duotones, this richly illustrated book brings to life the world of a fishing culture threatened by local and global forces.

Anatomical images of the human body recur in this retrospective of Doug Biden's prints and drawings. Because the artist died in March of pancreatic cancer, at the age of 50, it's easy to read a preoccupation with illness, medicine, and mortality into his art. Yet most of the work here predates Biden's 2005 diagnosis. It's as if his imagery were somehow prescient, as if his interest in social and biological systems and body politics anticipated his physical struggle and early end. An accomplished and respected printmaker, Biden exhibited his art nationally and internationally.

The Enjoyment of Music: Essential Listening Edition expands the available formats of the most trusted introduction to music with a new, brief, focused, and highly accessible textbook.

Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as 'naturalism'. Naturalism, in this context, denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on 'scientific' naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians and intellectually curious people in general.
