Technologies

When there are two woofers in the same enclosure with both woofers facing the same direction and one is wired out of phase, the woofer wired out of phase will move the opposite way.

File Type PDF 2

Way Push Pull

Within the subwoofer box, this can cause damage at high power levels because the woofers are moving in different directions and the pressure inside the enclosure can allow the

Subwoofers to
move too much

little.

One good way of finding a place for your subwoofer is to swap places with it. Put the subwoofer right up where you sit and turn on some bass-heavy music (or a bass-heavy

Walk around the room until you

find the place where the bass sounds best.

Now, swap back by putting the subwoofer in the spot where the bass sounded best.
