~~Hello Everyone My name is Mike I am new to TT. Happy to be here. I have a question regarding my 2 Stroke Polaris It is oil injected. I want to premix my gas and have been for 2 days now. my question is do I need to use a blockoff kit or can I just leave it the way it is? and also I read somewhere that some of these injection systems are used to lube other parts of the engine as well.~~

Thanks pjmartin, you are the first kind sole to confirm my suspicion that unlike a 2-stroke chain saw where the gas IS mixed with 2-stroke oil, this '96 Polaris Xplorer 4x4 2-stroke takes straight gas and the Oil cap/tank IS for the 2-stroke oil (not, unfortunately for me, the 10-30W oil I put in :nono: )

Hello all, I just picked up my first two stroke, a 2001 Polaris Xplorer 400. It has the oil injection system and I am worried about how reliable this is. Is there any way to tell visually that the pump is working as it should? I have ridden it only for a few hours like 1 or 2 and the oil level in the tank does not seem to be changing.

It had a two-stroke motor made by Fuji, which was a small-bore version of the motor in the 400cc snowmobile. Like its snow-going cousin, it had a belt and pulley and a continuously variable transmission that required no shifting. The 4WD products from Japan were four-strokes with manual shifting. The Polaris also had floorboards and unified brakes.

I have a 1997 polaris 400 2 stroke ATV that smokes an awful lot. I replaced the piston and rings, have compression of 125 psi and have adjusted the injector pump as per the manual. I removed the crankcase drain to make sure no oil is in there. There wasn't. I am at a loss to figure out where the oil is coming from to cause all this smoke.

The Mechanics . The biggest difference between the two engine types is the number of times the cylinder fires during a single phase of the engine's power cycle, known as the stroke.This cycle is comprised of the intake of gas/air, its compression, followed by the combustion that makes the vehicle go, and then dissipation of the exhaust through the exhaust pipes.

Automatic Control in Space is a compendium of papers presented on the Eighth IFAC Symposium that took place in Oxford, England in July 1979. The book is comprised of an assortment of presentations prepared by experts in the fields of engineering, computer science, robotics, optics, aeronautics, and other allied disciplines discussing various aspects

and types of automatic control systems and applications used in space technology. The text covers a broad range of topics on space technology, such as stabilization systems for space telescopes and balloon platforms; spacecraft attitude estimation and space navigation; and various control algorithms for different motion stabilization problems. Robotic systems; automatic control for large space transportations; and a path selection system for an autonomous Martian roving vehicle are presented as well. The text will be of high interest for engineers, computer scientists, physicists, inventors, astronomers, and various experts in space technology.

With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, *The Victory Motorcycle*.
