Human Resource Development Relies Upon a Strong Educational Foundation
In the Handbook of Human Resource Development, Neal Chalofsky, Tonette Rocco, and Michael Lane Morris have compiled a collection of chapters sponsored by the Academy of Human Resource Development to address the fundamental concepts and issues that HR professionals face daily. The chapters are written and supported by professionals who offer a wide range of experience and who represent the industry from varying international and demographic perspectives. Topics addressed form a comprehensive view of the HRD field and answer a number of key questions. Nationally and internationally, how does HRD stand with regard to academic study and research? What is its place in the professional world? What are the philosophies, values, and critical perspectives driving HRD forward? What theories, research initiatives, and other ideas are required to understand HRD and function successfully within this field? As the industry grows, what are the challenges and important issues that professionals expect to face? What hot topics are occupying these professionals now? The Handbook's insight and guidelines allows students and HR professionals to build a

This unique and comprehensive handbook examines the various models of stress, coping, and health and their relevance for nursing and related health fields. Building on the first edition that has been highly-praised for its analysis and critique of existing models and its discussion of new research surrounding self-regulation and stress, this Second Edition continues to provide a critical analysis of the field while providing up to date cutting-edge research. Under the expert editorship of Dr. Virginia Hill Rice, experienced scholars and practitioners present a broad range of issues and research that relate to stress and health, such as response-oriented stress; stimulus-oriented stress; and transactional stress, coping, and health in children, adolescents, attitudes, and much, much more.
