This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

The Death of Her is a haunting psychological thriller from Debbie Howells, author of the bestselling Richard and Judy Book Club success *The Bones of You*. A woman's body is discovered on a Cornish farm, battered and left for dead in a maize field. Airlifted to hospital, her life hanging in the balance, no one's sure who she is. Three days later she comes round, but her memory is damaged. She knows her

name – Evie – but no more, until she remembers another name. Angel – her three-year-old daughter. As the police circulate Evie’s photo, someone recognizes her. Charlotte knew her years ago, at school, when another child went missing. Leah Danning, who vanished whilst in Evie’s care. When the police search Evie’s home, there’s no sign of Angel. More disturbingly, there’s no evidence that she ever lived there, forcing the police to question whether Evie’s having some kind of breakdown. But even from the darkest place she’s ever known, Evie believes her daughter is alive. The police remain unconvinced – unaware that on the fringes of Evie’s life, there’s someone else. Someone hidden, watching her every move, with their own agenda and their own twisted version of reality. PRAISE FOR THE BONES OF YOU 'A dazzling debut . . . Haunting, compelling' Daily Mail

Despite being heavily endowed with land and other natural resources, Sub-Saharan Africa has the highest poverty rate in the world. A key to leveraging its land and natural resources to eradicate poverty is improving land governance, the subject of this book, centered on a ten point program to scale up land policy reforms and investments.

Today, Alternative Dispute Resolution (ADR) has gained international recognition and is widely used to complement the conventional methods of resolving disputes through courts of law. ADR simply entails all modes of dispute settlement/resolution other than the traditional approaches of dispute settlement through courts of law. Mainly, these modes are: negotiation, mediation, [re]conciliation, and arbitration. The modern ADR movement began in the United States as a result of two main concerns for reforming the American justice system: the need for better-quality processes and outcomes in the judicial system; and the need for efficiency of justice.

ADR was transplanted into the African legal systems in the 1980s and 1990s as a result of the liberalization of the African economies, which was accompanied by such conditionalities as reform of the justice and legal sectors, under the Structural Adjustment Programmes. However, most of the methods of ADR that are promoted for inclusion in African justice systems are similar to pre-colonial African dispute settlement mechanisms that encouraged restoration of harmony and social bonds in the justice system. In Tanzania ADR was introduced in 1994 through Government Notice No. 422, which amended the First Schedule to the Civil Procedure Code Act (1966), and it is now an inherent component of the country's legal system. In recognition of its importance in civil litigation in Tanzania, ADR has been made a compulsory subject in higher learning/training institutions for lawyers. This handbook provides theories, principles, examples of practice, and materials relating to ADR in Tanzania and is therefore an essential resource for practicing lawyers as well as law students with an interest in Tanzania. It also contains additional information on evolving standards in international commercial arbitration, which are very useful to legal practitioners and law students.

late Ming period. This collection, featured in hundreds of full color photographs, clearly shows to the world the great range and variety of Zhangzhou ware shipped to the Philippines during the 16th and 17th centuries of the Ming dynasty. Today, Zhangzhou ware continues to attract collectors because of its rustic charm.

Designed for beginning and amateur artists, this guide to the essentials of drawing features comprehensive, easy-to-follow lessons and more than 500 detailed illustrations. Frank Lohan, a renowned artist and popular instructor, conducts readers through each step of the creative process, from grasping the concepts of perspective and proportion to producing lifelike drawings of a variety of subjects—landscapes, architecture, animals, flowers, and faces. Step-by-step exercises focus on attaining the fundamentals of composition, visualizing the geometry of the subject, working with perspective, and mastering drawing techniques for both pencil and pen and ink. Each exercise includes gridded outline compositions to help students develop their drawing abilities. Suggestions for the selection and use of tools will assist in achieving professional-quality results.

Relaying a chronological account of the Metropolitan Museum's collection of pottery, porcelain and faïence, this book reveals the economic, cultural, and social history of diverse cultures through their ceramic and plastic arts. The catalogue has a global reach, covering the Far East, the Near East, and Europe while tracking the medium from its origins in Dynastic China to the elaborate works in the Rococo style. In his account, Pier also points to areas of the museum's ceramics and plastics collection that will continue to develop into a strong collection. At the time of writing, he identified the
