Shoot the back of the 7D) and move the wheel to change your focus point. This allows you to continuously control your point of focus without losing momentum in your session.

## Focus Points on the Canon 7D {and other models}

Thankfully, in all camera modes more advanced than 'Auto', you can select which AF points you want the camera to use (ie all of them, just some of them, or only a particular one). You'll either have a dedicated AF Point selection button (most Canon's do), or perhaps it's inside your menu (most Nikons it's under AF -> AF Area Mode) and honestly, for 95% of you photography, you're far better off setting it to

From reading the manual a while  
back I didn't think so. You certainly  
cannot with any Canon body I  
have ever used. I can do it:  
customize buttons then assign to  
the four direction buttons the  
function to move the focus point.  
He said "rear dial" so I took him  
to be talking about the rear dial  
and not the four direction  
buttons.

Using the autofocus modes on your Canon DSLR - Amateur ...  
A common question from Canon EOS owners is whether older manual focus lenses from other manufacturers can be used with a Canon EOS body. The answer is a qualified "yes" in many cases. Of course you don't get autofocus, nor do you get any sort of focus confirmation unless you use a special adapter with built in electronics.
