Covering the full spectrum of long-term care, Pratt's Long-Term Care: Managing Across the Continuum, Fifth Edition is an ideal introduction to management in this dynamic industry. Concise, yet

complete, it begins with a look at recent changes in long-term care and health care reform, before examining the various long-term care providers and their interaction with competition, payment systems, quality, and ethical issues. It moves on to explore managing in the long-term care system looking at administration, leadership, culture change, technology and community relations, and concludes with a look at future trends and managing continuing change. The Fifth Edition is a comprehensive revision reflecting new Federal Requirements of Participation from CMS for skilled nursing facilities and changes the Medicare-fee-for-service payment system (PDP). It also addresses the Affordable Care Act and its impact on long-term care, as well as the growth of technology in care, and more.

Effective Management of Long-Term Care Facilities explores the complex operations of the long-term care facility and offers critical skills to current and future nursing home administrators for delivering quality, cost-effective services. The Second Edition has been thoroughly revised and reorganized to offer a more cohesive presentation of the material. New chapters that have been added cover the long-term care industry, long-term care policy, and supportive case studies that incorporate management and patient care issues.

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk>.

This is a comprehensive graduate textbook focusing on the full spectrum of long-term care settings ranging from family and community-based care through supportive housing options to a variety of institutional long-term care alternatives. Integrating theory and practice, the book features the perspectives of diverse fields regarding current long-term care options and new directions for the future. Prominent scholars from history, environmental design, family caregiving, social service delivery, clinical care, health service delivery, public policy, finance, law, and ethics explore such themes as: Relationships among independence, dependence, and interdependence Ethical considerations woven into the provision of long-term care Decision-making in long-term care Fluidity in long-term care The lived experience of long-term care A micro-macro perspective ranging from the individual to societal institutions The book examines future directions for long-term care, considering such factors as the interface of technology and long-term care, cultural diversity, and relationships between voluntary and paid services. Each chapter includes case examples, study questions, and exercises, additional resources, and website links. An extensive glossary of terms is also provided, as well as instructor's resources are also available. Key Features: Focuses on the full array of long-term care options Integrates theory and practice Incorporates the perspectives of diverse fields including history, environmental design, family caregiving, social services, public policy, etc. Includes numerous case examples, study questions, exercises, and additional resources Considers new approaches to long-term care, incorporating technology and considering cultural diversity and voluntary vs. paid services About the Authors: Graham D. Rowles, PhD, is Founding Director of the Graduate Center for Gerontology and Chair of the Department of Gerontology, University of Kentucky. He is also Professor of Gerontology with joint appointments in Nursing, Behavioral Science, Geography and Health Behavior. An environmental gerontologist, his research focuses on the lived experience of aging. A central theme of this work is

exploration, employing qualitative methodologies of the changing relationship between older adults and their environments with advancing age, and the implications of this relationship for health, wellbeing and environmental design. He has conducted in-depth ethnographic research with elderly populations in urban (inner city), rural (Appalachian), and nursing facility environments. Recent research includes leadership of the Kentucky Elder Readiness Initiative (KERI), a statewide project to explore the implications for communities of the aging of the Baby Boom cohort. His publications include *Prisoners of Space?* and six co-edited volumes, in addition to more than 60 book chapters and articles. He is a Fellow of the Gerontological Society of America and the Association for Gerontology in Higher Education and currently serves on the editorial boards of the *Journal of Applied Gerontology* and *Journal of Housing for the Elderly*. Dr. Rowles is Past National President of Sigma Phi Omega, Past President of the Southern Gerontological Society, Past President of the Association for Gerontology in Higher Education, and is currently Chair of the Commonwealth of Kentucky Institute on Aging. Pamela B. Teaster, PhD, is Associate Director for Research, Center for Gerontology, and Professor, Department of Human Development, Virginia Tech University. She established the Kentucky Justice Center for Elders and Vulnerable Adults and is the first President of the Kentucky Guardianship Association. Dr. Teaster is Secretary General of the International Network for the Prevention of Elder Abuse. She served as Director and Chairperson of the Graduate Center for Gerontology/Department of Gerontology as well as the Director of Doctoral Studies and Associate Dean for Research for College of Public Health at the University of Kentucky. Dr. Teaster serves on the Editorial Board of the *Journal of Elder Abuse and Neglect*. She is a Fellow of the Gerontological Society of America and the Association for Gerontology in Higher Education, a recipient of the Rosalie Wolf Award for Research on Elder Abuse, the Outstanding Affiliate Member Award (Kentucky Guardianship Association), and the Distinguished Educator Award (Kentucky Association for Gerontology). She has received funding from The Retirement Research Foundation, Administration on Aging, National Institute on Aging, Kentucky Cabinet for Families and Children, National Institute of Justice, Centers for Disease Control, National Institute of Occupational Safety and Health, Health Resources and Services Administration, and the Office of Victims of Crime. She is the author of over 100 peer-reviewed articles, reports, books, and book chapters.

Practical approaches to the operation of long-term care facilities *Managing the Long-Term Care Facility* provides a comprehensive introduction to the growing field of long-term care. Taking a continuum-of-care approach, the text covers every aspect of long-term care. Readers will develop a robust knowledge of the issues faced by people experiencing physical and or mental changes. Topics covered include the biological and psychosocial implications of ageing, marketing long-term care, facility operations, and information technology for health care, among many others. By integrating all aspects of long-term care, the book is an invaluable resource that will aid students and professionals in preparing for career advancement and licensure exams. The book is also designed to help students prepare for the National Nursing Home Administrator exam. Pedagogical elements help guide readers through the content, and summaries and discussion questions to drive home lessons learned. Builds expert knowledge of all aspects of long-term care management, including operations, human resources, patient advocacy, and information systems Emphasizes the latest understandings of the long-term care continuum and patient-centered care for diverse populations Delivers practical approaches to providing quality care to individuals and making a positive impact on community wellbeing Prepares readers for and National Nursing Home Administrator's licensure exam *Managing the Long-Term Care Facility: Practical Approaches to Providing Quality Care* provides real-world guidance for students in healthcare administration, health and human services, gerontology, nursing, business and medical programs, in both domestic and international markets. Nursing home administrators, administrators-in-training and preceptors will find this book an effective training tool in the nursing facility setting.

From pain assessment methods to intravenous drip calculations, the Long-Term Care Nursing Desk

Reference offers long-term care nurses virtually every tool they need to provide high-quality, regulation-compliant, long-term resident care. Written by accomplished author and speaker Barbara Acello, MS, RN, this authoritative reference is jam-packed with practical, need-to-know patient care information, essential policies and procedures, and vital regulatory and safety requirements. In short, the Long-Term Care Nursing Desk Reference is the book you and your nurses have been waiting for!

Have you ever considered the advantages of creating a living trust? Avoiding probate through the use of living trusts is a well-known solution, but author Evan H. Farr takes this issue one step further. In *Protecting Your Assets from Probate and Long-Term Care*, Farr explains the need to consider both probate and the expenses of long-term care when you create a living trust. A revocable living trust, the main tool used for protecting your assets from probate, does not protect assets from the catastrophic expenses of long-term care. A very useful and popular estate planning tool, revocable living trusts are recommended by tens of thousands of attorneys across the United States and are used as the central estate planning document by millions of Americans. However, what most Americans don't realize is that assets in such a trust are not protected from lawsuits or from the limitless expenses associated with nursing homes or long-term care. In order to help readers protect themselves from both probate and long-term care, Farr delves into the many details you should know when creating a living trust. He also outlines his Living Trust Plus™ Asset Protection Trust, which is the only type of self-created asset protection trust that allows you to avoid probate and retain an interest in the trust while also protecting the assets from being counted by state Medicaid agencies. He details the process of avoiding probate and securing assets, including: Joint ownership problems Special needs planning How to pay for the nursing home Why Medicaid planning is ethical The ten most common Medicaid myths Finding the right lawyer *Protecting Your Assets from Probate and Long-Term Care* will help to ensure your family does not have to reap the consequences (and expenses) of improperly creating a living trust.
