## Chemistry A Study Of Matter

Chemistry is the study of matter, its composition and the changes it undergoes. During this semester, you will be introduced to the scientific method used to study matter and will be given the mathematical tools you will need for the remainder of the course. You will learn how matter is classified according to its properties and composition.

Chemistry Flashcards | Quizlet

Organic chemistry is a branch of chemistry that studies the structure, properties and reactions of organic compounds, which contain carbon in covalent bonding. Study of structure determines their chemical composition and formula. Study of properties includes physical and chemical properties, and evaluation of chemical reactivity to understand their behavior.

Chemistry is the study of matter—what it consists of, what its properties are, and how it changes. Matter is anything that has mass and takes up space—that is, anything that is physically real.

Some things are easily identified as matter—the screen on which you are reading this book, for example. Others are not so obvious.
