As a tradition, Christianity is more than a system of religious belief. It also has generated a culture, a set of ideas and ways of life, practices, and artifacts that have been handed down from generation to generation since Jesus first became the object of faith. Christianity is thus both a living tradition of faith and the culture that the faith leaves behind.

It is the tendency to be shallow in our understanding of God, wanting Him to be more of a gentle-grandfather type who spoils us and lets us have our own way. It is sensing a need for God, but on our own terms.

"The reader is taken on a global exploration of the forms and diversities of religions and their social and cultural contexts... It is up to the minute in research and theory, and comfortably grounded in the traditions of the social explanation of things religious and spiritual." - Gary Bouma AM, Monash University "Tells how sociology of religion originated in the work of key nineteenth and twentieth century theorists and then brings the story into the present era of globalization, hybrid spirituality, and the Internet. Students of religion will find this an engaging and informative survey of the field." - Robert Wuthnow, Princeton University "It considers the 'big questions' - What is religion? How is religion changing in a modern world? What is the future of religion? - and addresses them through tangible case studies and observations of contemporary life. Its global perspective reflects the breadth, diversity and vibrancy of this field." - Sylvia Collins-Mayo, Kingston University This is a rich and dynamic introduction to the varieties of religious life and the central issues in the sociology of religion today. It leads the reader through the key ideas and main debates within the field as well as offering in-depth descriptions and analysis of topics such as secularization, fundamentalism, Pentecostal Christianity, Buddhism, Hinduism, Islam, atheism, 'The spiritual marketplace', digital religion and new religions like Wicca. How does Christianity continue to experience growth in an increasingly authoritarian political system that enforces strict regulations on religion? How are ordinary Christians affected by social and political changes in the country, and how do they make their influence felt in wider society? Taking Chinese Christians ' experience as a case study, Lim and Sng examine the possibilities and limitations of Christian engagement in society under an authoritarian regime. They look especially at efforts by religious individuals and groups who are seeking to address social issues by engaging in unobtrusive and non-antagonistic activities that interact with controlling state institutions. Their emphasis is on everyday lived religion, analysing how Christians express their faith in their everyday activity and not only in spaces demarcated as falling within the religious domain. This book is a valuable reference for scholars and students looking to understand religion in relation to politics, culture and everyday life in rapidly modernising East Asian societies and particularly in China.

This book reconstructs the connection between religion and migration, drawing on post-colonial perspectives to shed light on what religion can contribute to migrant encounters. Examining the resources and motives for hospitality as lived in Christian contexts in the Nordic region, it addresses the content of talk about religion in public discourse, the concept having become something of an empty signifier in debates surrounding migration. Multidisciplinary in approach, this volume demonstrates that religion is not, in fact, an empty signifier, but gains substance through practice and interpretation. Considering the undeveloped potentiality of religion and the manner in which the unseen religious perspective in secularity becomes manifest in practice, this volume will appeal to social scientists and scholars of religion with interests in migration, refugee studies, theology, and Christian practice.

The rapidly growing Chinese Protestant Church faces a significant challenge: it must adapt itself to the unique dimensions of Chinese culture, leaving behind the trail of old missionary theology and molding an authentically Chinese approach to biblical interpretation and Christian life an approach that works within both the traditional and the contemporary dimensions of Chinese society. Rising from an extraordinary 2003 Sino-Nordic conference on Chinese contextual theology which brought Chinese university scholars and church theologians together for the first time Christianity and Chinese Culture addresses ways in which the church in China is responding to that challenge. The essays collected here highlight both the stunning complexities confronting Protestant Christianity in China and its remarkable potential. This is a most timely publication on the current issues and research on Christianity and Chinese culture in the PRC previously unavailable in English. The list of scholars in the collection reads like a Who s Who? in Christian studies in China, including both secular academics and Christian theologians. The final part on theological reconstruction is of particular interest, given its importance for the Protestant churches in the last decade. This book should be on the shelf of any scholar interested in the subject. Focusing on cultural change and the socio-political movements in the Pacific island nation of Vanuatu, this book uses both anthropological and historical analysis to examine the way the relationship between gender and Christianity has shaped processes of social change. Based on extensive research conducted over several decades, it is one of the few books available to focus on Vanuatu and on the impact of Christianity in Melanesia more generally – as well as on the significance of gender relations in understanding these developments. Providing a model for understanding and comparing processes of change in small-scale societies, this fascinating book will appeal to scholars and students interested in the ethnography of Melanesia and in issues related to contemporary cultural change and gender more generally.
