Client engagement or treatment engagement in psychotherapy is one of the most significant aspects of the therapeutic process. It reflects the level of healthy attachment a client has with the therapist and directly impacts on the prognosis. There are multiple identifiers of positive therapeutic engagement, some of which are:

What is Client Engagement in Therapy and How to Apply It?

The therapeutic process holds both majesty and mystery for its participants. Client knowledge about the process ranges from total unfamiliarity with and/or misinformation about therapy—and what to expect of it—to the unique sophistication of the client who has entered into episodic therapy with several therapists.

Carl Ransom Rogers (January 8, 1902 – February 4, 1987) was an American psychologist and one of the founders of the humanistic approach (or client-centered approach) to psychology.Rogers is widely considered to be one of the founding fathers of psychotherapy research and he was honored for his pioneering research with the Award for Distinguished Scientific Contributions by the American ...

Carl Rogers - Wikipedia

Psychologists should strive to be patient not only with challenging clients, but also with themselves, says Sarah A. Schnitker, PhD, an associate professor of psychology at Fuller Theological Seminary in Pasadena, California. Her research has uncovered two strategies that can help psychologists cultivate more patience.

Coping with challenging clients

In psychology a client is a person who is receiving services from a therapist or mental health doctor. The term client is often used interchangeably with the word patient. There is no official distinction from the two different terms - neither is right or wrong. Many therapists use either term or both.
