Written by financial aid officers, this insider's guide shows parents what they must do to keep up with mounting costs for their child's college education.

A smart, snappy, and comprehensive guide for the millions of adults who are thinking about going—or going back—to college and want to know how to do it right As anyone who has done it knows, going back to school is a major undertaking. For younger and older adults alike, starting or returning to school presents different challenges than those encountered by teens fresh out of high school and heading straight to college. Countless Americans take on this task while working, raising kids, caring for parents, volunteering, serving in the military—and in some cases all of the above. Although the "non-traditional" undergraduate student is in fact the new normal, the glut of college guides out there don't include practical advice for the busy moms, frustrated employees, and ambitious adults who are applying to college or hoping to finish earning a degree. Never Too Late will help readers jump-start a new professional path or speed down the one they're already on by guiding them through vital questions: What should I study? How can I afford the time and money required to get a college degree? How do I compare schools? With key chapters on flexibility ("It's About Time!" and "Face-to-Face or Cyberspace?") and rankings of the best colleges for grown-ups diving back into the books, Never Too Late is an essential reference for adults seeking a richer life—and a meaningful place in our rapidly changing economy and world.

Talking Affirmative Action takes a fresh look at race-conscious admissions policies, offering an exceptionally vivid, grass-roots rendering of how whites on both sides of the issue come to terms with the ethical and political dilemmas these policies pose, especially in the context of high-stakes competitions for places in graduate professional schools. The book is based on in-depth interviews of undergraduate men attending an inner-city, public university that has always drawn an especially diverse mix of students with respect to economic background as well as race and ethnicity. Those men's arguments for and against quotas and targets, expanded criteria, and 'prime-the-pump' programming or outreach are explored in relation to several larger questions: What precisely do we mean by 'merit,' and what's the best way to measure it? Just how important, really, is ethnic diversity, either in the classroom or among top-level professionals and executives? How distinctive is the history of discrimination against blacks and Latinos, and to what extent can this explain present-day inequalities? How much equality of opportunity is enough, and how far must white America go to ensure it? In a nuanced analysis of how advocates' and opponents' perspectives on these issues diverge and overlap, the author challenges the widespread assumption that opposition to race-conscious policies is simply an expression of racism-as well as the allegation that champions of these and other liberal policies have simply forsworn 'traditional values.' Resistance, endorsement, and ambivalence are traced instead to the paradoxical dictates of a common ethos, with respect to both individual autonomy and communal accountability. The book concludes with some provocative commentary on the future of affirmative action in the wake of the Supreme Court's 2003 decisions in favor of 'holistic' assessment.
