technology has brought us to the make-or-break moment in human history. We can either grow complacent, and go extinct like the dinosaurs, or spread throughout the cosmos, as Carl Sagan dreamed of. What if your toothbrush becomes smarter than you? What happens to your business, your country, your planet and yourself? What if your car doesn't need a driver anymore? What if we don't need to age and die? What if machines are smarter than us? What if, instead of fear of the future - you see opportunity, instead of an end - you see a beginning, instead of loss - you see profit, and instead of death - you see life? What if you and your organization get future-primed? For many years Nikola Danaylov has been interviewing the future and motivating people all over the world to embrace rather than fear it. "Conversations with the Future" was born from those interviews

Roadmap, myth, or history? The Book of Revelation draws readers and repels them. It offers some people hope and instills fear in others. In this volume of the new AABS series Frederick W. Schmidt, also the series editor, explores the approaches that have dominated the interpretation of John's Apocalypse and offers the reader an accessible means of understanding and

evaluating them. With this grounding in

hand, Schmidt explores how Revelation can shape our understanding of God, and nurture our spiritual lives in unexpected ways. Leaving behind left-behind theology, Schmidt offers instead an approach that allows this obscure, almost opaque text to speak to us anew about God, faith, hope, and justice. Books in this series, co-sponsored by the Anglican Association of Biblical Scholars, are written in accessible language, sensitive to the needs of people who have little or no experience in reading the Bible. Each book focuses on exploring the historical and critical background, as well as how the biblical texts written centuries ago can still speak to readers today.

Political Conversations in Ciceronian Rome offers for the first time a perspective of Roman politics through the

Future 21 Visions For The

21st Century
proxy of conversations and meetings. In Rome oral was the default mode of communication in politics: oratory before the people in assemblies, addresses and discussions in the Senate, speeches in the law courts, rumours, and public opinion.

We are familiar with the notion that the Roman political world of the Late Republic included lofty speeches and sessions of the Senate, but an important aspect of Late-Republican politics revolved around senators talking among themselves, chatting off in the corner. Only when they could not reach each other in person, Roman senators and their peers resorted to letters. This book intends to analyse political conversations and illuminate the oral dimension of Roman politics. It posits that the study of politics should not be restricted to the senatorial group, but that other persons should be considered as important political actors

with their own agency (albeit in different degrees), such as freedmen and elite women. It argues that Roman senators and their entourages met in person to have conversations in which they discussed politics, circulated political information and negotiated strategies; this extra-institutional sphere had a relevant impact both on politics and institutions as well as determined how the Roman Republic functioned.

America's status as a world power lies at a historic turning point. The strategies employed to win the wars of the twentieth century are no longer working, and the United States must contend with the changing nature of power in a globalized world. In *America and the World* two of the most respected figures in American foreign policy, Zbigniew Brzezinski and Brent Scowcroft, dissect the challenges

Conversations With The

facing the U.S. today: whether we should withdraw our troops from Iraq or keep them there; how we should approach Iran, Israel, and Palestine; how aggressively we should push to expand NATO to Russian borders; how we can (and must) maintain our role in the Far East; and many other questions. In spontaneous and unscripted conversations the two authors explore their agreements and their disagreements. An essential primer on a host of urgent issues, *America and the World* defines the center of responsible opinion on American foreign policy at a time when the nation's decisions could determine how long it remains a superpower

Authored by cataloging librarians, educators, and information system experts, this book of essays addresses ideas and methods for tackling the modern challenges of cataloging and metadata

Frances is a coolheaded and darkly

observant young woman, vaguely pursuing a career in writing while studying in Dublin. Her best friend is the beautiful and endlessly self-possessed Bobbi. At a local poetry performance one night, they meet a well-known photographer, and as the girls are then gradually drawn into her world, Frances is reluctantly impressed by

Conversations With The

the older woman's sophisticated home and handsome husband, Nick. But however amusing Frances and Nick's flirtation seems at first, it begins to give way to a strange—and then painful—intimacy. Written with gemlike precision and marked by a sly sense of humor, *Conversations with Friends* is wonderfully alive to the pleasures and dangers of youth, and the messy edges of female friendship. SHORTLISTED FOR THE INTERNATIONAL DUBLIN LITERARY AWARD “Sharp, funny, thought-provoking . . . a really great portrait of two young women as they're figuring out how to be adults.”—Celeste Ng, “Late Night with Seth Meyers Podcast” “The dialogue is superb, as are the insights about communicating in the age of electronic devices. Rooney has a magical ability to write scenes of such verisimilitude that even when little

happens they're suspenseful."—Curtis Sittenfeld, *The Week* "Rooney has the gift of imbuing everyday life with a sense of high stakes . . . a novel of delicious frictions."—New York "A writer of rare confidence, with a lucid, exacting style . . . One wonderful aspect of Rooney's consistently wonderful novel is the fierce clarity with which she examines the self-delusion that so often festers alongside presumed self-knowledge. . . . But Rooney's natural power is as a psychological portraitist. She is acute and sophisticated about the workings of innocence; the protagonist of this novel about growing up has no idea just how much of it she has left to do."—Alexandra Schwartz, *The New Yorker* "This book. This book. I read it in one day. I hear I'm not alone."—Sarah Jessica Parker (Instagram)

Conversations With The

Cyberculture is a particularly complex issue. It is seen as a fantastic meeting point of classic philosophers with

postmodern theorists, politicians with community engineers, contemporary sophists with software engineers, and artists with rhetoricians. Today,

cyberculture is identified highly with new media and digital rhetoric and could be used to create a comprehensive map of modern culture. Present and Future

Paradigms of Cyberculture in the 21st Century is a comprehensive research

publication that explores the influence of the internet and internet culture on society as a whole. Highlighting a wide range of topics such as digital media, activism, and psychology, this book is ideal for academicians, researchers, sociologists, psychologists, anthropologists, and students.
