By the middle of the fourteenth century, Christian control of the Iberian Peninsula extended to the borders of the emirate of Granada, whose Muslim rulers acknowledged Castilian suzerainty. No longer threatened by Moroccan incursions, the kings of Castile were diverted from completing the Reconquest by civil war and conflicts with neighboring Christian kings. Mindful, however, of their traditional goal of recovering lands formerly ruled by the Visigoths, whose heirs they claimed to be, the Castilian monarchs continued intermittently to assault Granada until the late fifteenth century. Matters changed thereafter, when Fernando and Isabel launched a decade-long effort to subjugate Granada. Utilizing artillery and expending vast sums of money, they methodically conquered each Na rid stronghold until the capitulation of the city of Granada itself in 1492. Effective military and naval organization and access to a diversity of financial resources, joined with papal crusading benefits, facilitated the final conquest. Throughout, the Na rids had emphasized the urgency of a jih d waged against the Christian infidels, while the Castilians affirmed that the expulsion of the "enemies of our Catholic faith" was a necessary, just, and holy

cause. The fundamentally religious character of this last stage of conflict cannot be doubted, Joseph F. O'Callaghan argues.

CONTENIDO: Introducción / Título I. Antecedentes y Estado actual. El enfoque desde la Ciencia Política / Título II. Aspectos económicos y organizativos / Título III. Aspectos jurídico-administrativos / Título IV. Aspectos laborales / Título V. Supuestos especiales, protección de la salud y externalización de los servicios / Unas breves reflexiones a modo de conclusiones. RESUMEN: Esta monografía es el resultado de un trabajo de carácter claramente multidisciplinar, en el que se han abordado las cuestiones adelantadas en párrafos precedentes y que quieren servir como referentes objetivos para la toma de decisiones. Cada una de ellas por un conjunto de expertos de acuerdo a su perfil profesional. A estos efectos, se quiere señalar que no se ha limitado a un diseño teórico, sino que se ha realizado un análisis de los problemas que han ido surgiendo, las soluciones jurisprudenciales y el enfoque de actividades o sectores o su puestos muy concretos en el ámbito de lo público. Se ha conseguido, de esta forma, articular una guía completa que puede servir de base para que cada Administración, a la vista del análisis de conjunto que representa esta memoria, pueda someter a un control de eficiencia la opción que adopte desde tres perspectivas: la de su régimen jurídico en el marco administrativo, la gestión de personas en el ámbito laboral y su ordenación en el plano estrictamente organizacional y económico. La característica esencial de este trabajo es su cercanía a la realidad, en su aplicabilidad y en la elaboración de un documento de uso que puede servir, como hemos adelantado, para objetivar la toma de decisiones. Lo deseable, es que, a partir de aquí, se valore la oportunidad de diseñar un protocolo objetivo de actuación. Compuesta en su estructura, de títulos y capítulos completamente autónomos, lo que permite la lectura de cada una de las materias de forma independiente, la obra, como no puede ser de otra manera, guarda una coherencia interna, ordenada según el reparto de trabajo realizado desde un primer momento y para responder a los objetivos planteados en el proyecto en cuyo seno se lleva a cabo.

La presente obra analiza, desde una perspectiva práctica, hasta qué punto se articula e imbrica el principio colaborativo en los procesos de CPI, en los que Administración se obliga a buscar ideas novedosas mediante la celebración de consultas preliminares al mercado y la elaboración de mapas que agrupen la demanda temprana, siendo clave el cumplimiento a los principios generales de la contratación pública en estas actuaciones previas. Asimismo, se analizan las peculiaridades que requieren las prescripciones técnicas de los Pliegos y la ejecución de las mismas, que suponen adaptar la cultura de la innovación por la vía de las funcionalidades de lo que se pretende comprar, y no de las características técnicas de productos o servicios preexistentes.
