microscopy.

Diagnosis of Parasitic Infections: What's Going On ...

Endoscopy is used to find parasites that cause diarrhea, loose or watery stools, cramping, flatulence (gas) and other abdominal illness. This test is used when stool exams do not reveal the cause of your diarrhea. This test is a procedure in which a tube is inserted into the mouth (endoscopy) or rectum (colonoscopy) so that the doctor, usually a gastroenterologist, can examine the intestine. This test looks for the parasite or other abnormalities that may be causing your signs and symptoms.

CDC - Parasites - Resources - Diagnosis

Molecular assays (e.g. nucleic acid amplification tests such as PCR, DNA Probes) are reliable but expensive diagnostic tools which can be used for the diagnosis of intestinal parasitic infections. So far, molecular assays are not preferred method of diagnosis for stool parasites.

Diagnosis Of Parasitic Disease Home Oie

Parasitic disease, in humans, any illness that is caused by a parasite, an organism that lives in or on another organism (known as the host). Parasites typically benefit from such relationships, often at the expense of the host organisms. Parasites of humans include protozoans, helminths, and ectoparasites (organisms that live on the external surface of a host).
