Environmental Planning for Sustainable Development. Tan Yong Soon. Land Use. Long-term and integrated land-use planning plays a major role in protecting the environment. At the macro level, Singapore's development is guided by the Concept Plan, a strategic, long-term land-use plan that maps the land-use vision for Singapore over the next 40 to ...

Environmental Planning for Sustainable Development

Environmental planning is the process of facilitating decision making to carry out land development with the consideration given to the natural environment, social, political, economic and governance factors and provides a holistic framework to achieve sustainable outcomes. A major goal of environmental planning is to create sustainable communities, which aim to conserve and protect undeveloped land.

### Environmental Planning | WYG

Go-ahead for 205,500 sqm employment scheme on unallocated green belt site despite 'significant' environmental impact. Plans have been approved for a 205,500 square metre logistics scheme on an unallocated green belt site on Merseyside, despite a recognition from planners that the development would see the loss of "significant areas of established and protected woodland".
