Environmental governance is
a concept in political
ecology and environmental
policy that advocates
sustainability (sustainable
development) as the supreme
consideration for managing
all human
activities—political, social
and economic. Governance
includes government,
business and civil society,
and emphasizes whole system
management. To capture this

In specifying governance arrangements in the environmental context, Lemos and Agrawal (2006, p. 298) identify as relevant the full range of “regulatory processes, mechanisms and organizations through which political actors influence environmental actions and outcomes”. They stress that while governance is distinct from government, it does
