Aromatherapy is now one of the most popular forms of complementary therapy. Essential oils are used with the hope of treating and preventing illness, as well as encouraging rest and relaxation. For this reason, aromatherapy is especially beneficial for stress-related concerns like headaches, insomnia and anxiety. An aromatherapist can target the cause of stress and create a personal plan (and suitable concoction of essential oils) for the individual.

Aromatherapy | Essential Oils - Therapy Directory

Aromatherapy is the use of essential oils to improve health and wellbeing. There is some evidence that it might help with general well-being, anxiety and some side effects of cancer treatment. But we need more research. Summary. Aromatherapy uses essential oils to treat symptoms of cancer and its treatment.
