### EU Administrative Governance

Policy implementation at EU level plays a prominent role in EU administrative governance despite the fact that since its very beginnings the E (E)C and later also the EU have been based on what has come to be referred to as 'executive federalism'9. Generally, Member States apply and enforce policies and law adopted at European level.

### The European Ombudsman and Good Administration in the ...

The European Union said today that it wants to work with US counterparts on a common approach to tech governance -- including pushing to standardize rules for applications of technologies like AI and pushing big tech to be more responsible for what their platforms amplify. EU lawmakers are anticipating rebooted transatlantic relations under the incoming administration of president-elect Joe Biden.

This book is a unique contribution to the understanding of the reality of government and governance in the European Union.

'This book is a valuable compendium. . . provides a useful starting point for future studies on administrative leadership and administrative self-organization. . .' - Paul W. Thurner, European Law Books This book is a unique contribution to the understanding of the reality of government and governance in the European Union (EU).

The word Eurocracy has resonance throughout out Europe but in reality we know little about the people who work in and around the EU or how they fit into its large bureaucratic framework. Based on extensive fieldwork, this book addresses this problem by exploring the MEPs, diplomats, civil servants and commissioners that work in and around the EU.

Drawing on research from the administrative sciences and using organizational, institutional and decision-making theories, this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU's administrative capacities is essential to understand how it shapes European public policy.

The role of regions in the European Union has been frequently debated since the 1980s. This comprehensive book provides a thorough overview of the issue from a variety of perspectives, analysing regional governance and territorial dynamics in the EU and its member states. Focusing on the implications of the democratisation–regionalisation nexus, it argues that a 'Europe with the regions' may promote good governance and ameliorate the democratic deficits of the EU.

This thesis aims at addressing the problem of a potential dis-embedding of the EU administration from democratic institutions. For that purpose it explores the potential of a novel approach to EU constitutionalism, namely of European conflicts-law to ensure the democratic legitimacy of EU administrative governance of GMOs. The term administrative governance is being used as referring to a system of administrative action, in which EU administrative actors implement EU law in cooperation with national administrations, as well as with scientific and private experts. In order to analyse the functioning of this system governance is employed as analytical framework. This thesis shows that the conflicts-law approach constitutes a valuable constitutional framework. It helps to identify and better understand the legitimacy problems of EU administrative governance in the field of GMOs. The existent legal rules in this area can to a certain extent be reconceived as embodying conflicts-law mechanisms and ideas. This is most visible in their aim to procedurally organise cooperation between various actors within horizontal network structures of decision-making. However, the implementation of GMO rules in practice has considerably undermined the functioning of conflicts-law mechanisms. The analysis reveals problematic shifts of authority, which go beyond the system of shared responsibility envisaged by the EU legislator. Instead of administrative cooperation between national and supranational actors, hierarchy in the sense of central decision-making by the Commission dominates the process. Moreover, instead of shared responsibility between public authorities and the biotech industry, the applicant has become a powerful player of GMO regulation. This has to some extent also undermined the application of the precautionary principle in this area. This thesis concludes that attempts of EU law to constitutionalise administrative governance of GMOs in a legitimate way have not proven to be successful so far. Finally, this thesis also reveals certain limitations of the conflicts-law approach. It is suggested that conflicts-law at present should not be considered as a fully-fledged theory of European integration. Its strength lies in the ability to re-direct the discussion on democratic legitimacy of EU law, and to offer constitutional ideas for further elaboration of regulatory solutions. However, further conceptual clarifications seem necessary in order to make it operational in concrete cases of EU regulation.

This book explores the work of the European Ombudsman and her or his contribution to holding the EU institutions, bodies, offices and agencies to account, through examination of complaints on maladministration, own-initiative inquiries and other proactive efforts. It considers the Ombudsman's current institutional and constitutional position and her or his 'method' of dealing with complaints, and unravels the depth of subject matters that fall under the Ombudsman's remit. A separate chapter focuses on transparency and access to documents. The last part of the book critically reflects upon the present mandate and practice of the Ombudsman, and discusses a number of possible proposals for improvement. This work has interdisciplinary appeal and will engage scholars in law, political science and public administration, as well as EU and national policy-makers.

Exploring the constitutional and the administrative law dimensions of the developing European market governance, this volume considers the changes which have occurred from the perspective of both legal and social theory.

This book assesses the many changes that have occurred within the European Parliament and in its external relations since the Lisbon treaty (2009) and the last European elections (2014). It is undoubtedly the institution that has evolved the most since the 1950s. Despite the many crises experienced by European integration in the last years, the Parliament is still undergoing important changes in its formal competences, its influence on policy-making, its relations with other EU institutions, its internal organisation and its internal political dynamics. Every contribution deals with the most recent aspects of these evolutions and addresses overlooked topics, providing an overview of the current state of play which challenges the mainstream intergovernmental approach of the EU. This project results from research conducted at the Department of European Political and Governance Studies of the College of Europe. Individual research of several policy analysts of the European Parliamentary Research Service (EPRS) have contributed to this endeavour.

But European administrative law is a work under construction. This book helps to explore the current state of affairs. Thomas Gross, Common Market Law Review Drs Hofmann and Türk made a name for themselves in the field of EU administrative law with their first collection of edited essays, *EU Administrative Governance* (Edward Elgar) 2006, which was well reviewed and made an important contribution to the subject. The focus of their new collection, *Legal Challenges in EU Administrative Law*, is accountability, internal through structures and procedures and external through courts and auditors. With its many useful contributions from well-known experts it promises well. Carol Harlow, London School of Economics, UK The move towards a system of integrated administration in the EU poses considerable legal challenges. This book explores ways in which accountability, legality, legitimacy and efficiency can be ensured in the multiple forms of co-operation of European and national administrations in the delivery of EU and EC policies. Examining the procedures and structures of European administrative integration, this innovative book will be a stimulating read for academics, researchers and both undergraduate and postgraduate students in European law.
