potential health conditions or problems of the family.

Family Nursing Care Plan: Assessment & Diagnoses in
Family ...

Family nursing is a part of the primary care provided to patients of all ages, ranging from infant to geriatric health. Nurses assess the health of the entire family to identify health problems and risk factors, help develop interventions to address health concerns, and implement the interventions to improve the health of the individual and family. Family nurses often work with patients through their whole life cycle.
