Introduction. In the work known as Harmonice Mundi, the German scientist and mathematician, Johannes Kepler (1571-1630) presented to the world the culminating application to questions of astronomy of the method which he had defined in his first book (Mysterium Cosmographicum (1599). Many know of Harmonice Mundi as the work in which Kepler announced

~~Johannes Kepler: Somnium (The Dream) | The Somnium Project~~
Kepler concluded that the orbit of Mars was an ellipse with the Sun in one of its foci (a result which when extended to all the planets is now called "Kepler's First Law"), and that a line joining the planet to the Sun swept out equal areas in equal times as the planet described its orbit ("Kepler's Second Law"), that is the area is used as a measure of time.
