Abstract: This thesis looks at the fundamental issues of fourth party logistics in Germany.

The areas of interpretation, acceptance and potential implementations are covered in particular. After a brief introduction in Chapter 1, Chapter 2 offers an insight into

# Get Free Fourth Party Logistics

the topic area in the form of a literature review. The literature review explains the origins of the 4PL-concept as well as functions performed by a 4PL-provider. Different types of 4PL-providers and inter-organisational set-ups are presented. Afterwards the main areas of discussion

# Get Free Fourth Party Logistics

are identified. Areas such as outsourcing theory and channel concepts have relevance and are dealt with as well. Although the 4PL-basics are not necessarily country-specific, the literature review relies heavily on German sources. In Chapter 3 a conceptual model

# Get Free Fourth Party Logistics

concerning the topic is presented and hypotheses are developed. In order to test the developed hypotheses, primary data is collected in the form of a Delphi expert discussion. This process is described in detail in Chapter 4. The logistics experts for the panel are drawn

# Get Free Fourth Party Logistics

from shippers, service providers and researchers; the discussion consists of two rounds. The results of the Delphi process are analysed in Chapter 5 followed by Chapter 6 in which the hypotheses are tested and conclusions are drawn. The findings can be summarised

# Get Free Fourth Party Logistics

by stating that the panellists generally expressed very pragmatic viewpoints. Further, several of the often-quoted arguments in the 4PL-discussion were weakened by the findings. At the same time it has to be mentioned that especially the shippers were often

split in their opinions.

This thesis does not aim at ending the 4PL-discussion, but

instead hopes to fuel it by looking at certain aspects from different viewpoints. Inhaltsverzeichnis:Table of

considered to be the optimal option for a Fourth-Party Logistics provider to start the partnership cooperation.

However, this approach can differ from the client's point of view. The ways, which companies prefer for cooperation with a 4PL provider, were studied in this

# Get Free Fourth Party Logistics

Thesis. For this purpose structured interviews were organized (online questionnaire, face-to-face interviews) in order to find, would companies pay for an initial analysis and if not how they think then a 4PL provider would be able to implement its services. According to

Several groups of

PL provider should  
start with projects,  
which do not require  
significant  
investments and an  
analysis of
