How Fascism Works: The Politics of Us and Them (Audio ...

Fascist politics loathes cosmopolitanism and concentrates on the heartland, dislikes unions, and venerates hard work and hierarchy. It aims its message outside large cities and is especially resonant during globalisation. It focusses on traditional values of self-sufficiency put at risk by the success of liberal cities culturally and economically.

[Fascism is] a form of political behavior marked by obsessive preoccupation with community decline, humiliation, or victimhood and by compensatory cults of unity, energy, and purity, in which a mass-based party of committed nationalist militants, working in uneasy but effective collaboration with traditional elites, abandons democratic liberties and pursues with redemptive violence and without ethical or legal restraints goals of internal cleansing and external expansion.

How Fascism Works by Jason Stanley: 9780525511854 ...

Benito Mussolini, who was the first to use the term for his political party in 1915, described fascism in The Doctrine of Fascism as follows: Granted that the 19th century was the century of socialism, liberalism, democracy, this does not mean that the 20th century must also be the century of socialism, liberalism, democracy.

Definitions of fascism - Wikipedia

NPR's Leila Fadel speaks to Jason Stanley, author of How Fascism Works: The Politics of Us and Them, about President Trump's refusal to concede and his party's willingness to go along with it TANLEY: So fascism is a cult of the leader who promises national restoration in the face of supposed humiliation by minorities, liberals and immigrants.

"No single book is as relevant to the present moment."—Claudia Rankine, author of Citizen "One of the defining books of the decade."—Elizabeth Hinton, author of From the War on Poverty to the War on Crime NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE • With a new preface • Fascist politics are running rampant in America today—and spreading around the world. A Yale philosopher identifies the ten pillars of fascist politics, and charts their horrifying rise and deep history. As the child of refugees of World War II Europe and a renowned philosopher and scholar of propaganda, Jason Stanley has a deep understanding of how democratic societies can be vulnerable to fascism: Nations don't have to be fascist to suffer from fascist politics. In fact, fascism's roots have been present in the United States for more than a century. Alarmed by the pervasive rise of fascist tactics both at home and around the globe, Stanley focuses here on the structures that unite them, laying out and analyzing the ten pillars of fascist politics—the language and beliefs that separate people into an "us" and a "them." He knits together reflections on history, philosophy, sociology, and critical race theory with stories from contemporary Hungary, Poland, India, Myanmar, and the United States, among other nations. He makes clear the immense danger of underestimating the cumulative power of these tactics, which include exploiting a mythic version of a nation's past; propaganda that twists the language of democratic ideals against themselves; anti-intellectualism directed against universities and experts; law and order politics predicated on the assumption that members of minority groups are criminals; and fierce attacks on labor groups and welfare. These mechanisms all build on one another, creating and reinforcing divisions and shaping a society vulnerable to the appeals of authoritarian leadership. By uncovering disturbing patterns that are as prevalent today as ever, Stanley reveals that the stuff of politics—charged by rhetoric and myth—can quickly become policy and reality. Only by recognizing fascists politics, he argues, may we resist its most harmful effects and return to democratic ideals. "With unsettling insight and disturbing clarity, How Fascism Works is an essential guidebook to our current national dilemma of democracy vs. authoritarianism."—William Jelani Cobb, author of The Substance of Hope

How propaganda undermines democracy and why we need to pay attention Our democracy today is fraught with political campaigns, lobbyists, liberal media, and Fox News commentators, all using language to influence the way we think and reason about public issues. Even so, many of us believe that propaganda and manipulation aren't problems for us—not in the way they were for the totalitarian societies of the mid-twentieth century. In How Propaganda Works, Jason Stanley demonstrates that more attention needs to be paid. He examines how propaganda operates subtly, how it undermines democracy—particularly the ideals of democratic deliberation and equality—and how it has damaged democracies of the past. Focusing on the shortcomings of liberal democratic states, Stanley provides a historically grounded introduction to democratic political theory as a window into the misuse of democratic vocabulary for propaganda's selfish purposes. He lays out historical examples, such as the restructuring of the US public school system at the turn of the twentieth century, to explore how the language of democracy is sometimes used to mask an undemocratic reality. Drawing from a range of sources, including feminist theory, critical race theory, epistemology, formal semantics, educational theory, and social and cognitive psychology, he explains how the manipulative and hypocritical declaration of flawed beliefs and ideologies arises from and perpetuates inequalities in society, such as the racial injustices that commonly occur in the United States. How Propaganda Works shows that an understanding of propaganda and its mechanisms is essential for the preservation and protection of liberal democracies everywhere.

Feeding Fascism uses food as a lens to examine how women's efforts to feed their families became politicized under the Italian dictatorship.

How Fascism Works: The Politics of Us and Them by Jason Stanley: Conversation Starters Fascism is on the rise and we ought to see the patterns of fascist politics and resist it. Fascist tactics create divisions among people which lead to a weak society that will easily succumb to proposals of authoritarian governance. This book explains the populist presidency of Trump, the Brexit phenomenon, the rise of Hungarian leader Orban who is supported by rightist politicians, the five-star movement and its roots in Italy, the authoritarian leadership of Erdogan, and many similar fascist developments around the globe. How Fascism Works is written by Jason Stanley, the author of two award-winning books, Know How: Languages in Context: Knowledge and Practical Interests and How Propaganda Works. A Brief Look Inside: EVERY GOOD BOOK CONTAINS A WORLD FAR DEEPER than the surface of its pages. The characters and their world come alive, and the characters and its world still live on. Conversation Starters is peppered with questions designed to bring us beneath the surface of the page and invite us into the world that lives on. These questions can be used to... Create Hours of Conversation: - Promote an atmosphere of discussion for groups - Foster a deeper understanding of the book - Assist in the study of the book, either individually or corporately - Explore unseen realms of the book as never seen before Disclaimer: This book you are about to enjoy is an independent resource meant to supplement the original book. If you have not yet read the original book, we encourage you to before purchasing this unofficial Conversation Starters.

"Fascists," "Brownshirts," "jackbooted stormtroopers"—such are the insults typically hurled at conservatives by their liberal opponents. Calling someone a fascist is the fastest way to shut them up, defining their views as beyond the political pale. But who are the real fascists in our midst? Liberal Fascism offers a startling new perspective on the theories and practices that define fascist politics. Replacing conveniently manufactured myths with surprising and enlightening research, Jonah Goldberg reminds us that the original fascists were really on the left, and that liberals from Woodrow Wilson to FDR to Hillary Clinton have advocated policies and principles remarkably similar to those of Hitler's National Socialism and Mussolini's Fascism. Contrary to what most people think, the Nazis were ardent socialists (hence the term "National socialism"). They believed in free health care and guaranteed jobs. They confiscated inherited wealth and spent vast sums on public education. They purged the church from public policy, promoted a new form of pagan spirituality, and inserted the authority of the state into every nook and cranny of daily life. The Nazis declared war on smoking, supported abortion, euthanasia, and gun control. They loathed the free market, provided generous pensions for the elderly, and maintained a strict racial quota system in their universities—where campus progressives were all the rage. The Nazis led the world in organic farming and alternative medicine. Hitler was a strict vegetarian, and Himmler was an animal rights activist. Do these striking parallels mean that today's liberals are genocidal maniacs, intent on conquering the world and imposing a new racial order? Not at all. Yet it is hard to deny that modern progressivism and classical fascism shared the same intellectual roots. We often forget, for example, that Mussolini and Hitler had many admirers in the United States. W.E.B. Du Bois was inspired by Hitler's Germany, and Irving Berlin praised Mussolini in song. Many fascist tenets were espoused by American progressives like John Dewey and Woodrow Wilson, and FDR incorporated fascist policies in the New Deal. Fascism was an international movement that appeared in different forms in different countries, depending on the vagaries of national culture and temperament. In Germany, fascism appeared as genocidal racist nationalism. In America, it took a "friendlier," more liberal form. The modern heirs of this "friendly fascist" tradition include the New York Times, the Democratic Party, the Ivy League professoriate, and the liberals of Hollywood. The quintessential Liberal Fascist isn't an SS storm trooper; it is a female grade school teacher with an education degree from Brown or Swarthmore. These assertions may sound strange to modern ears, but that is because we have forgotten what fascism is. In this angry, funny, smart, contentious book, Jonah Goldberg turns our preconceptions inside out and shows us the true meaning of Liberal Fascism.

#1 New York Times Bestseller A personal and urgent examination of Fascism in the twentieth century and how its legacy shapes today's world, written by one of the most admired public servants in American history, the first woman to serve as U.S. secretary of state A Fascist, observed Madeleine Albright, "is someone who claims to speak for a whole nation or group, is utterly unconcerned with the rights of others, and is willing to use violence and whatever other means are necessary to achieve the goals he or she might have." The twentieth century was defined by the clash between democracy and Fascism, a struggle that created uncertainty about the survival of human freedom and left millions dead. Given the horrors of that experience, one might expect the world to reject the spiritual successors to Hitler and Mussolini should they arise in our era. Fascism: A Warning is drawn from Madeleine Albright's experiences as a child in war-torn Europe and her distinguished career as a diplomat to question that assumption. Fascism, as she shows, not only endured through the twentieth century but now presents a more virulent threat to peace and justice than at any time since the end of World War II. The momentum toward democracy that swept the world when the Berlin Wall fell has gone into reverse. The United States, which historically championed the free world, is led by a president who exacerbates division and heaps scorn on democratic institutions. In many countries, economic, technological, and cultural factors are weakening the political center and empowering the extremes of right and left. Contemporary leaders such as Vladimir Putin and Kim Jong-un are employing many of the tactics used by Fascists in the 1920s and 30s. Fascism: A Warning is a book for our times that is relevant to all times. Written by someone who not only studied history but helped to shape it, this call to arms teaches us the lessons we must understand and the questions we must answer if we are to save ourselves from repeating the tragic errors of the past.

The first and only guide to turning your 21st century democracy into a fascist paradise. Democracy is difficult, flawed and unstable. It involves barely distinguishable political parties taking part in lengthy, overcomplicated and expensive decision-making processes. Trying to engage so many people with political issues seems to lead only to complexity and disagreement. So why bother? Doesn't fascism guarantee a more effective and efficient management of the state? In this short, bitinglly ironic mixture of On Tyranny and The Psychopath Test, Italian political activist Michela Murgia explores the logic that is attracting increasing numbers of voters to right-wing populism. Far from its origins in the 20th century, fascism is once again on the rise in an age of increased connectivity and globalism. Murgia shows how many of the elements of our society that we might think would combat closed-mindedness and xenophobia actually fan the flames. Closing with a "fascistometer" to measure the reader's own authoritarian inclinations, How to be a Fascist is a refreshingly direct, polemical book that asks us to confront the fascism in our governments, in our societies, and in our own political leanings.

They Rule reflects on key political questions raised by the Occupy movement, showing how similar questions have been raised by previous generations of radical activists: who really owns and rules the US? Does it matter that the nation is divided by stark class disparities and a concentration of wealth in the hands of a few? Along the way, this book sharpens readers' sense of who the US oligarchy are, including how their fortunes have changed over the course of US history, how they live and think and how to detect and de-cloak them. They Rule is a masterful historical and political analysis, revealing what lies beneath the surface of US society and what ordinary people can do to bring about social change.

A trenchant and timeless examination of the still-contested meanings of President Barack Obama's election, from a preeminent scholar of race, politics, and American history with a new introduction by the author. When voters in 2008 chose the United States' first black president, some Americans hailed the event as a sign that the nation had, at long last, transcended its bloody history of racial inequality. Obama's victory was indescribably momentous, but if the intervening years proved anything, it is that we never leave history entirely behind. Indeed, this may be the ultimate lesson of the Obama era. First published in 2010, The Substance of Hope is acclaimed historian Jelani Cobb's meditation on what Obama's election represented, an insightful investigation into the civil rights movement forces that helped produce it, and a prescient inquiry into how American society does-and does not-change. In penetrating, elegant prose, Cobb teases apart the paradoxes embodied in race and patriotism, identity and citizenship, progress and legacy. Now reissued with a new introduction by the author, reflecting on how the seismic impact of the Obama presidency continues to shape America, The Substance of Hope is an indelible work of history and cultural criticism from one of our most singular voices.
