key importance for understanding how Newfoundland became a Canadian province in 1949. In 1946 forty-five convention delegates were elected to consider the condition and prospects of Newfoundland and Labrador, and make recommendations to the British government concerning the forms of government that should be put before the electorate in a referendum. The debates and committee reports were not published after the Convention's dissolution in 1948; they are now brought together in an accessible form for the first time.

This volume gives the proceedings of STACS 92. Topics include parallel algorithms, logic and semantics, computational geometry, automata and languages, structural complexity, complexity, distributed systems, algorithms, cryptography, VLSI, words and rewriting, and systems.

Neary draws material from both public and private sources in the United Kingdom, Canada, the United States, and Newfoundland. Following a brief summary of major developments in Newfoundland before 1929, he gives an account of the tumultuous events that led to the demise of responsible self-government and the establishment of a British-appointed Commission of Government in 1934. He details and evaluates the major policies of the commission during three distinct phases: the continuing hard times of the 1930s, the boom years of the Second World War, and the period of post-war adjustment. The reasons for constitutional change are examined and Neary explains clearly why Newfoundland became a province of Canada in 1949. Through a fine blending of domestic and international history, he reveals the intricate connections between events in

Newfoundland and in the rest of the North Atlantic World, providing a balanced view which takes into account constitutional, political, economic, and social developments. He acknowledges the role of British, Canadian, and American policymakers in determining the course of events in Newfoundland and illuminates the role that Newfoundlanders themselves played at a critical time in their history.

“Quite a tasty treat, replete with anecdotes from the author’s childhood and lots of culinary history and Newfoundland foodways.” —Atlantic Books Today Inspired by her desire to stay connected to the food of her home province, culinary writer Liz Feltham goes back to her roots to bring fresh and modern twists to favorite Newfoundland meals, or “scoffs.” A Real Newfoundland Scoff provides recipes using traditional ingredients from the sea, land, air, bakeshop, and bar to create non-traditional dishes. Above all, Liz encourages readers to use this cookbook as a guide to exploring, discovering, and creating new versions of their old Newfoundland favorites. Packed with fifty-six new recipes, thirty color photographs, and a guide for buying Newfoundland ingredients in Atlantic Canada, this cookbook will appeal to all Newfoundland chefs, traditional and adventurous alike. “Feltham, a trained chef, treats popular traditional Newfoundland foods with respect and imagination. . . [She] writes with a warm and friendly spirit in this attractive book with lovely photographs by Halifax’s Scott Munn. You’ll never look at Newfoundland cuisine the same again.” —Atlantic Books Today

North Atlantic and elsewhere. Twentieth-Century Shore-Station Whaling in Newfoundland and Labrador adds to a growing number of regionally specific case studies that collectively illustrate the complex nature of the history of global whaling. Dickinson and Sanger further demonstrate how participants in the industry were instrumental in developing other whaling initiatives, including those in British Columbia.
