case studies from around the world. The book further covers essential new topics, including international conflict, social networking, migration, and the effects technology and mass media play in the globalization of communication. Featuring several all-new chapters, revisions, and updates, the Second Edition of *A Cultural Approach to Interpersonal Communication* presents an interdisciplinary collection of key readings that explore how interpersonal communication is socially and culturally mediated. Includes key readings from the fields of cultural and linguistic anthropology, sociolinguistics, and communication studies. Features new chapters that focus on digital media. Offers new introductory chapters and an expanded toolkit of concepts that students may draw on to link culture, communication, and community. Expands the *Ethnographer's Toolkit* to include an

introduction to basic concepts followed by a range of ethnographic case studies

This text addresses the core issues and concerns of intercultural communication by integrating three different perspectives: the social psychological, the interpretive, and the critical. The dialectical framework, integrated throughout the book, is used as a lens to examine the relationship of these research traditions.

In the fully updated Seventh Edition of *Intercultural Communication: A Contextual Approach*, bestselling author James W. Neuliep provides a clear contextual model (visually depicted by a series of concentric circles) for examining communication within cultural, microcultural, environmental, sociorelational, and perceptual contexts. Students are first introduced to the broadest context—the cultural component of the model—and progress chapter by chapter through the model to the most specific dimensions of communication. Each chapter focuses on one context and explores the combination of factors within that context, including setting, situation, and circumstances. Highlighting values, ethnicity, physical geography, and attitudes, the book examines means of interaction, including body language, eye contact, and exchange of words, as well as the stages of relationships, cross-cultural management, intercultural conflict, and culture shock.

This handbook takes a multi-disciplinary approach to offer a current state-of-art survey of intercultural communication (IC) studies. The chapters aim for conceptual comprehension, theoretical clarity and empirical understanding with good practical implications. Attention is mostly on face to face communication and networked communication facilitated by

digital technologies, much less on technically reproduced mass communication. Contributions cover both cross cultural communication (implicit or explicit comparative works on communication practices across cultures) and intercultural communication (works on communication involving parties of diverse cultural backgrounds). Topics include generally histories of IC research, theoretical perspectives, non-western theories, and cultural communication; specifically communication styles, emotions, interpersonal relationships, ethnocentrism, stereotypes, cultural learning, cross cultural adaptation, and cross border messages; and particular context of conflicts, social change, aging, business, health, and new media. Although the book is prepared for graduate students and academicians, intercultural communication practitioners will also find something useful here.
