The books combine fun, magical characters and fantastic illustrations with National Curriculum- focused activities *Motivating activities based on the KS2 National Curriculum *Step-by-step learning introduced by fun characters *Includes gold stickers to reward achievement

Dr. Thaddeus Abrams is found murdered. The kill is the work of a prolific serial killer and FBI profiler Mika Scott arrives to lead the investigation at the Atlanta PD where she was once Detective Jake Roberts' ex-partner and lover. Jake's in a steamy love affair with flight attendant Lori Powers. Tensions run high when Jake discovers who the killer is. Will they get there in time to stop another murder?

With interest in beadweaving on the rise, Mastering Peyote Stitch provides a much-needed look into the most integral technique—peyote stitch. With 15 styles in all, beading geniuses will finally have an accessible, easy-to-understand guide to one of the fundamentals of beadweaving, brought to you courtesy of Beadwork Editor Melinda Barta. In the "Peyote Basics" chapter, you will learn the basics of creating flat peyote bands, then advance to circular and tubular variations, eventually learning to fashion dimensional jewelry pieces. Once you've mastered the basics, Melinda dives into designing dimensional jewelry pieces. Additional chapters cover combining peyote with other popular beadweaving techniques (right-angle weave, herringbone, and bead embroidery) and creating unique edgings and embellishments for finished pieces. Melinda, together with Beadwork's Designers of the Year, including Jean Campbell, Lisa Kan, Carole Ohi, Melanie Potter, Jean Power, Cynthia Rutledge, and Sherry Serafini, demonstrates a range of styles in 15 beautiful jewelry projects.

MONEY... Andrew Reynolds is determined to stay in New York City as long as his sister Marie, a cancer patient, needs him. But despite his good looks and talent, Andrew hasn't managed to find work as an actor. With his bank account empty and his credit cards maxed, Andrew needs money fast. Gay escorts make a nice living, but there's one problem-Andrew isn't gay. SEX... Ever since his early teens, when Andrew's father shocked everyone by coming out, Andrew has been uncomfortable around gay men. Pretending to be gay will be the role of a lifetime. From male/male dates to erotic toys, spankings and more extreme play, Andrew must satisfy his clients without revealing his usual tastes. ... AND ROMANCE Andrew's first date with closeted politician Cormac Donovan ends in disaster. Yet with each successive booking, the attraction between them grows. As Andrew struggles with unexpected new feelings, Cormac puts his senatorial career in danger. And what began as a way for Andrew to earn money becomes a one-way ticket to heartbreak-or lasting love.

Despite some global risks, external conditions for Latin America should remain stimulative. With monetary policy in advanced economies expected to stay accommodative, external financing conditions will remain favorable. Strong demand from emerging Asian economies and the gradual recovery of advanced economies will continue to support commodity prices, benefiting exporters. The main policy challenge for most of the region is to take advantage of current conditions to continue buttressing a foundation for sustained growth. Other issues important to the region include: (i) strengthening balance sheets; (ii) understanding how changes in external conditions could impact public and external debt dynamics; and (iii) making the best use of the windfall from the recent terms-of-trade boom.

The first account of local geometric Langlands Correspondence, a new area of mathematical physics developed by the author.

The Thirty-Nine Steps: "A bored, well-to-do Englishman, Richard Hannay, returns home to England after growing up in South Africa. Drifting between his club and the sights of London, he is drawn into the confidences of a secret agent in the thick of espionage. The agent is murdered in Hannay's apartment and Richard finds himself on the run from Scotland Yard and the cult of the 'Black stone.'" Shapiro. Fic for Youth. 3rd ed. ""John Buchan is the father of the modern spy thriller ... Buchan wrote the formula ..."

Human genomes are 99.9 percent identical,with one prominent exception. Instead of a matching pair of X chromosomes, men carry a single X, coupled with a tiny chromosome called the Y. Tracking the emergence of a new and distinctive way of thinking about sex represented by the unalterable, simple, and visually compelling binary of the X and Y chromosomes, Sex Itself examines the interaction between cultural gender norms and genetic theories of sex from the beginning of the twentieth century to the present, postgenomic age. Using methods from history, philosophy, and gender studies of science, Sarah S. Richardson uncovers how gender has helped to shape the research practices, questions asked, theories and models, and descriptive language used in sex chromosome research. From the earliest theories of chromosomal sex determination, to the mid-century hypothesis of the aggressive XYY supermale, to the debate about Y chromosome degeneration, to the recent claim that male and female genomes are more different than those of humans and chimpanzees, Richardson shows how cultural gender conceptions influence the genetic science of sex. Richardson shows how sexual science of the past continues to resonate, in ways both subtle and explicit, in contemporary research on the genetics of sex and gender. With the completion of the Human Genome Project, genes and chromosomes are moving to the center of the biology of sex. Sex Itself offers a compelling argument for the importance of ongoing critical dialogue on how cultural conceptions of gender operate within the science of sex.
