Read Book Photographic Atlas

Developmental

This text, now available in FULL COLOR, presents developmental biology as an ongoing process of enquiry, giving students a sense of the ways developmental biologists gain knowledge and a taste of the

Read Book

Photographic

challenges ahead.

The first part of the text focuses on the classical methods of analysis and the stages of embryonic development from gametogenesis to histogenesis. Part Two introduces the genetic and molecular analysis of development. The final part combines

Read Book

Photographic

classical and modern types of analysis towards the investigation of long standing problems in development. Key experiments are described throughout to reinforce the relationship between scientific models and experimental data.

Exploring Zoology: A

Page 38/58
