Environmental Science for a Changing World captivates students with real-world stories while exploring the science concepts in context. Engaging stories plus vivid photos and infographics make the content relevant and visually enticing. The result is a text that emphasizes environmental, scientific, and information literacies in a way that engages students.

This landmark text captures and redefines the richness and diversity of GIS, in an accessible form. It presents a clearly/defined path to a world of learning about GIS, using the Internet and closely/couples reference sources. It is richly produced and illustrated unlike any other in the field, with over 300 full colour illustrations. Unique in several ways, it presents comprehensive treatments of: Geographic Information Science in the scientific context to GIS, technical content and geographic implications The real value of GIS is illustrated using real world applications. Treatments emphasize operational, tactical and strategic issues The impact of Internet GIS on interdisciplinary science and society The pivotal role of GIS as a business driver in the information age including the role of GIS as a business asset and the operational dynamics of its use in practice Learning resources include: Links to ESRI's Virtual Campus which includes modules specially written to accompany the book (http://campus.esri.com) Instructor's Manual to assist in the planning and use of this text in a variety of academic environments (http://www.wiley.co.uk/gis) Free online access to relevant chapters of the first edition of the two-volume iBig Book is! (http://www.wiley.co.uk/gis) Questions for further study at the end of each chapter (http://www.wiley.co.uk/gis) PowerPoint slides to assist teaching

Temples were important structures in any civilization and the ancient Egyptians were of no exception. How the temples were created, when they were created and who wanted them created hold important clues on the belief systems and religion dominated during that time. In this book, we'll be visiting the famous temples of Ancient Egypt. Grab a copy today!

Visualizing Human Biology is a visual exploration of the major concepts of biology using the human body as the context. Students are engaged in scientific exploration and critical thinking in this product specially designed for non-science majors. Topics covered include an overview of human anatomy and physiology, nutrition, immunity and disease, cancer biology, and genetics. The aim of Visualizing Human Biology is a greater understanding, appreciation and working knowledge of biology as well as an enhanced ability to make healthy choices and informed healthcare decisions.

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSDs path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition.We follow Dr. Hofmanns trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery.Underlying it all is Dr. Hofmanns powerful conclusion that mystical experience may be our planets best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people.Now, more than sixty years after the birth of Albert Hofmanns problem child, his vision of its true potential is more relevant, and more needed, than ever.
