Communication Systems - Courses >

The text certainly has very comprehensive coverage of signal analysis for an introductory course, it certainly lacks the depth needed for an advanced course. And unfortunately the writing is so poor and the typos so numerous that the book cannot help but confuse and discourage those first learning a pretty complex field such as signal analysis.

Block signaling. The New York City Subway system has, for the most part, used block signaling since its 1904 opening. As of May 2014, the system consists of about 14,850 signal blocks, 3,538 mainline switches, 183 major track junctions, 10,104 automatic train stops, and 339,191 signal relays. Trains used to be controlled by signal towers at interlockings, but this was eventually phased out in ...
