Small Animal ECGs: An Introductory Guide: Martin, Mike ...

In small animals six limb leads (ECG traces derived from a pair of electrodes) are produced from the reading of the four electrodes. These are named leads I, II, III, aVR, aLV, aVF. The trace should always be read from left to right. Ideally it should be read from the start but if this is too difficult then the most recognisable portion should be identified and the trace read from this point.
