"Blue Pelican Java" is a somewhat unusual high school computer science textbook. Most computer science texts will begin with a section on the history of computers followed with a flurry of definitions that are just "so many words" to the average student. The approach here is to first give the student some experience upon which to hang the definitions that

come later. The usual practice of introducing classes and objects is deferred until the student has a firm grasp of the fundamentals (loops, decision structures, etc). Thus, the beginning student is not overwhelmed by the simultaneous introduction of OOPs and the fundamentals. The book includes plenty of exercises (many in "contest" form), programming projects, and a huge appendix.

Including the red-winged blackbird, painted bunting, wood duck, great blue heron, ruby-throated hummingbird, purple finch, and blue jay, 46 different species of birds from all parts of the United States are included in this book. The pictures have been faithfully redrawn by Paul E. Kennedy from originals by John James Audubon (1785-1851), the most famous American painter-naturalist. For each species, the caption supplies the modern common and scientific names and the current range (by general region). No distinction is made between breeding range and winter range. Only the area of the United States, exclusive of Alaska and Hawaii, is considered. The birds shown are usually adult males when the caption does not give the information on age and sex. Audubon's original plates, numbered to correspond to the pages of the book, have been reproduced in color on the covers. If you follow them, you will not only have a great deal of coloring pleasure, but you will also learn how to identify many important birds.

You can't change the past. . . . When Michael fires his new rifle into the air on his seventeenth birthday, he never imagines that the bullet will end up killing someone. But it does—and Michael's world is changed forever. Desperate, he wrestles with his guilt and keeps silent as his life begins to fall apart. When Jenna's father is killed in a freak Fourth of July accident, she's devastated. As she grieves, she tries to understand why she no longer feels comfortable with her boyfriend, Jason, and why a guy named Michael keeps appearing in her dreams. . . . Swallowing Stones is a haunting novel about choices . . . and devastating consequences.

A frequent contributor to the New York Times magazine, Outside, Salon, and GQ, and a regular on Public Radio International's "This American Life," David Rakoff's debut collection of essays is simultaneously laugh-out-loud funny and take-your-breath-away poignant. David Rakoff is a fish out of water. Whether he finds himself on assignment climbing Mount Monadnock in New Hampshire — donning a pair of Timberlands for his trek, only to realize with horror that "the shoes I wouldn't be caught dead in might actually turn out to be the shoes I am caught dead in." — sitting quietly impersonating Sigmund Freud in a department store window...for a month, or musing on the unique predicament of being undetectably Canadian in New York City ("...what's more spicy than being Canadian, I ask you?"), Rakoff has a gift for exposing life's humour and pathos. Fraud takes us places even we didn't know we wanted to go: expeditions as varied as a search for elves in Iceland, a foray into soap opera acting, or contemplating the gin-soaked olive at the bottom of a martini glass. With the sharpest of eyes, David Rakoff explores the odd and ordinary events of life, spotting what is unique, funny and absurd in the world around him. But for all its razor-sharp wit and snarky humor, Fraud is also, ultimately, an object lesson in not taking life, or oneself, too seriously.

The long-awaited sequel to the "Concepts and Practice of Mathematical Finance" has now arrived. Taking up where the first volume left off, a range of topics is covered in depth. Extensive sections include portfolio credit derivatives, quasi-Monte Carlo, the calibration and implementation of the LIBOR market model, the acceleration of binomial trees, the Fourier transform in option pricing and much more. Throughout Mark Joshi brings his unique blend of theory, lucidity, practicality and experience to bear on issues relevant to the working quantitative analyst. "More Mathematical Finance" is Mark Joshi's fourth book. His previous books including "C++ Design Patterns and Derivatives Pricing" and "Quant Job Interview Questions and Answers" have proven to be indispensable for individuals seeking to become quantitative analysts. His new book continues this trend with a clear exposition of a range of models and techniques in the field of derivatives pricing. Each chapter is accompanied by a set of exercises. These are of a variety of types including simple proofs, complicated derivations and computer projects. Chapter 1. Optionality, convexity and volatility 1 Chapter 2. Where does the money go? 9 Chapter 3. The Bachelier model 23 Chapter 4. Deriving the Delta 29 Chapter 5. Volatility derivatives and model-free dynamic replication 33 Chapter 6. Credit derivatives 41 Chapter 7. The Monte Carlo pricing of portfolio credit derivatives 53 Chapter 8. Quasi-analytic methods for pricing portfolio credit derivatives 71 Chapter 9. Implied correlation for portfolio credit derivatives 81 Chapter 10. Alternate models for portfolio credit derivatives 93 Chapter 11. The non-commutativity of discretization 113 Chapter 12. What is a factor? 129 Chapter 13. Early exercise and Monte Carlo Simulation 151 Chapter 14. The Brownian bridge 175 Chapter 15. Quasi Monte Carlo Simulation 185 Chapter 16. Pricing continuous barrier options using a jump-diffusion model 207 Chapter 17. The Fourier-Laplace transform and option pricing 219 Chapter 18. The cos method 253 Chapter 19. What are market models? 265 Chapter 20. Discounting in market models 281 Chapter 21. Drifts again 293 Chapter 22. Adjoint and automatic Greeks 307 Chapter 23. Estimating correlation for the LIBOR market model 327 Chapter 24. Swap-rate market models 341 Chapter 25. Calibrating market models 363 Chapter 26. Cross-currency market models 389 Chapter 27. Mixture models 401 Chapter 28. The convergence of binomial trees 407 Chapter 29. Asymmetry in option pricing 433 Chapter 30. A perfect model? 443 Chapter 31. The fundamental theorem of asset pricing. 449 Appendix A. The discrete Fourier transform 457 Praise for the Concepts and Practice of Mathematical Finance: "overshadows many other books available on the same subject" -- Zentralblatt Math "Mark Joshi succeeds admirably - an excellent starting point for a numerate person in the field of mathematical finance." -- Risk Magazine "Very few books provide a balance between financial theory and practice. This book is one of the few books that strikes that balance." -- SIAM Review

Old Europe's new crisis. Europe, the charming continent of windmills and gondolas. But lately, Europe has become the continent of endless strikes and demonstrations, bombs on the trains and subways, radical Islamic cells in every city, and ghettos so hopeless and violent even the police won't enter them. In Spain, a terrorist attack prompts instant capitulation to the terrorists' demands. In France, the suburbs go up in flames every night. In Holland, politicians and artists are murdered for speaking frankly about Islamic immigration. This isn't the Europe we thought we knew. What's going on over there? Traveling overland from London to Istanbul, journalist Claire Berlinski shows why the Continent has lately appeared so bewildering—and often so thoroughly obnoxious—to Americans. Speaking to Muslim immigrants, German rock stars, French cops, and Italian women who have better things to do than have children, she finds that Europe is still, despite everything, in the grip of the same old ancient demons. Anyone who knows the history can sense it: There is

something ugly—and familiar—in the air. But something new is happening as well. Indeed, Europe now confronts—and seems unable to cope with—an entirely new set of troubles. Tracing the ancient conflicts and newly erupting crises, *Menace in Europe* reveals: □ Why Islamic radicalism and terrorist indoctrination flourish as Europe fails to assimilate millions of Muslim immigrants □ How plummeting birthrates hurtle Europe toward economic and cultural catastrophe □ Why hatred of America has become ubiquitous—on Europe's streets, in its books, newspapers, and music, and at the highest levels of government □ How long-repressed destructive instincts are suddenly reemerging □ How the death of religious faith has created a hopeless, morally unmoored Europe that clings to anti-Americanism, anti-Semitism, and other dangerous ideologies □ Why the notion of a united Europe is a fantasy and what that means for the United States In the end, these are not separate issues. Berlinski provocatively demonstrates that Europe's political and cultural crisis mirrors its profound moral and spiritual crisis. But this is not just Europe's problem. *Menace in Europe* makes clear that the spiritual void at the heart of Europe is ultimately our problem too. And America will pay a terrible price if we continue to ignore it.

This is a concise, systematic and complete treatment of the design and construction of pile foundations. Discusses pile behavior under various loadings and types of piles and their installation, including consideration of soil parameters. It provides step-by-step design procedures for piles subject to vertical loading and pullout, lateral, inclined and eccentric loads, or dynamic loads, and for piles in permafrost. Also describes load test procedures and their interpretation and buckling of long, slender piles with and without supported length. The closing chapter presents case histories of prediction and performance of piles and pile groups. Includes numerous solved problems.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Back from the Undead DD Barant Another work day, another case for the Bloodhound Files. But this time, Jace is truly stumped: How is she, a mere human, supposed to penetrate the dark heart of a child-trafficking ring of pire orphans—one that turns out to be part of a blood-farm operation, in the crime-ridden border city of Vancouver, British Columbia? Jace is in over her head. But with the help of her former lover, Tanaka—whose family is one of the last samurai clans left in Japan—she stands a chance at seeking justice for the condemned children... Until the Yakuza tries to put an end to Jace's investigation. Jace risks more than death—this time, it's the fate of her very soul that's in danger . . .

Move over sliced bread; there's a new fare in town. Tortillas are now an indisputable staple of the American diet. Expand your horizons beyond the humble quesadilla with the help of this funky new cookbook, *Eat More Tortillas*. Try Smoked Salmon Triangles, Sloppy Joe Tacos, Southwest Lasagna, Tortilla Cannolis . . . and the list goes on with 75 recipes for breakfasts, soups, salads, snacks, dinners, and desserts—each featuring the beloved tortilla. Whether you're cooking a family meal, prepping for game day, snacking on the go, or navigating your first kitchen, this bargain cookbook will give anyone plenty of reasons to *Eat More Tortillas*. Donna Kelly grew up in southern Arizona. She has appeared on Martha Stewart's Sirius radio show, *Everyday Food*, and writes for *Apronstringsblog.com*. She is the author of nine cookbooks including *Quesadillas* and *Burritos*. She lives in Utah. Stephanie Ashcraft has spent several years teaching classes on cooking as well as on saving time and money both in person and on television. Author of the first in Gibbs Smith's best-selling "101 things" series, she has contributed to 12 additional books in the series as well as *200 Cake Mix Creations* and *200 Salads*. She lives in Salem, Utah with her husband and children.
