In the 1970s, as car

enthusiasts in the

U.S. grew bored with

models manufactured

Under tightening B5
pollution and safety
regulations, some
innovative dealers
exploited a legal
loophole--designed to
allow U.S. soldiers
and diplomats to
return from abroad
with their vehicles--to
import exotic cars
never intended for
sale in America.

During the 1980s, a

Acces PDF

Technical

rise in the value of the dollar made car shopping in Europe a bargain hunter's dream. A network of unauthorized "gray market" dealers emerged, bypassing factory channels. Middle-class Americans suddenly found they could afford a Mercedes or BMW. These cars had

to pass through U.S. customs, equipped to handle only a few independent imports annually. As applications ballooned, the regulatory system collapsed. This is the story of a misunderstood but fascinating period in the automotive industry, when

creative importers

found ways to put American motorists in new Ferraris while the EPA and DOT were backed up with mounds of paperwork.

A television series is tagged with the label "cult" by the media, advertisers, and network executives when it is considered edgy or offbeat, when it appeals to nostalgia, or when it is considered emblematic of a particular subculture. By these criteria, almost any series

could be described as

cult. Yet certain

programs exert an

uncanny power over

their fans,

encouraging them to
