...

The point of this all isn't just a sciencey way of saying that people are really judgmental. That may be true [4] It's true., but the more important take-away for how we understand psychology is that our impressions of other people might come down to three simple judgments: their morality, sociability, and competence. Among these three, it seems

Summary: A new mathematical model of causal judgment reproduces people's intuition better than previous models. Source: UC Santa Barbara Like a parent being pestered with endless questions from a young child, most people will now and again find themselves following an infinite chain of cause and effect when considering what led to some particular event.
