~~The Tall Book of Mother Goose (Harper Tall Book) by Olga~~

This collection of Mother Goose nursery rhymes is the best I know. For some children the format of a "tall" book is difficult to handle, but from my experience with eight children most between one year and four years do very well. The illustrations are charming.

The term "Mother of the Book" (or the Mother Book) is believed to represent the Full Knowledge, the essence of all Divine revelations without regard to time and space, the codes known to Him but not understandable by us. It does not necessarily represent a physical book. The following ayat may explain better.

The most popular and best loved rhymes of Mother Goose presented for the very young

The Tall Book is a celebration of the tall-advantaged, which notes and explores the myriad benefits that come with living large--from the simple pleasures of being able to see over crowds at a parade, to the professional joys of earning more money, and having others perceive you as a natural leader. The Tall Book also offers well-researched explanations into the great unanswered questions of tallness, including: Why are people tall to begin with? How have tall people figured throughout history? Why are CEOs so tall? And how does tallness affect the dating game? Filled with illustrative graphics, charts, and piles of tall miscellanea and factoids, The Tall Book is a wonderful and much-needed exploration of life from on high.

Twelve easy to read stories coupled with Aleksey Ivanov's charming illustrations make this book a treasury to share again and again. Full list of tales: 1. Little Red Riding Hood 2. City Mouse, Country Mouse 3. The Gingerbread Man 4. Cinderella 5. The Three Bears 6. Jack and the Beanstalk 7. Chicken Little 8. The Tortoise and the Hare 9. The Little Red Hen 10. The Ugly Duckling 11. The Three Little Pigs 12. The Princess and the Pea Ages 4+

"Did Mama sing every day?" Caleb asks his sister Anna. "Every-single-day," she answers. "Papa sang, too." Their mother died the day after Caleb was born. Their house on the prairie is quiet now, and Papa doesn't sing anymore. Then Papa puts an ad in the paper, asking for a wife, and he receives a letter from one Sarah Elisabeth Wheaton, of Maine. Papa, Anna, and Caleb write back. Caleb asks if she sings. Sarah decides to come for a month. She writes Papa: I will come by train. I will wear a yellow bonnet. I am plain and tall, and Tell them I sing. Anna and Caleb wait and wonder. Will Sarah be nice? Will she like them? Will she stay?

In her heartfelt and humorous novel, Bauer (Hope Was Here) leaves teenage girl protagonists in favor of a middle-grade boy as she did also in Sticks (1996). But her fans won't be disappointed. At first, 12-year-old Tree, "six feet, three and a half inches and growing," only literally "stands tall." At school, Coach Glummer expects him to lead the basketball team (though he's not very athletic) and teachers expect him to act older than his age. On the home front which shifts weekly due to his parents' recent divorce and joint custody arrangement Tree is the glue of his family. He helps care for his Vietnam vet grandfather (who recently had a leg amputated) while worrying about his aging dog, Bradley, his two college-student brothers and his parents. Bolstered by his budding friendship with the outspoken new girl at school, Sophie, and by Grandpa, Tree finds an inner strength that helps him deal with just about anything including a natural disaster. Bauer once again creates a clan of believable characters scrambling to make the best of their particular brand of dysfunction. Her swiftly paced story artfully blends poignant and outright funny moments, resulting in a triumphant tale that will resonate with many young readers. Ages 10-up.

IPPY Award Winner From nonsense to lessons learned, these 45 rhymes include the very well known (Itsy Bitsy Spider) and the somewhat familiar (Hickety, Pickety, My Black Hen). The truly fantastic pictures speak more than a thousand words as artist Scott Gustafson riffs in paint on themes present and imagined in each verse. Nursery rhymes are classic, and so are some of the artist's interpretations. But other paintings are surprises, like an anthropomorphic baking bear, a pelican sea captain, and Peter Piper as a pug on two legs. Welcome to a world where "There Was a Crooked Man" is not about a hunchbacked senior but rather a madcap, double-jointed dandy who might be "crooked" in more ways than one. Jack (Be Nimble) is a leaping cricket and Yankee Doodle a fun-loving chipmunk on a fullsize horse. Scott Gustafson's unique style, influenced by legendary book illustrators Arthur Rackham and N. C. Wyeth, makes this a volume to be treasured by children and illustrated-book lovers of all ages.

NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest--a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; she's been compared to Rachel Carson, hailed as a scientist who conveys complex, technical ideas in a way that is dazzling and profound. Her work has influenced filmmakers (the Tree of Souls of James Cameron's Avatar) and her TED talks have been viewed by more than 10 million people worldwide. Now, in her first book, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths--that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life: that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes--in inspiring, illuminating, and accessible ways--how trees, living side by side for hundreds of years, have evolved, how they perceive one another, learn and adapt their behaviors, recognize neighbors, and remember the past; how they have agency about the future; elicit warnings and mount defenses, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies--and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them--embarking on a journey of discovery, and struggle. And as she writes of her scientific quest, she writes of her own journey--of love and loss, of observation and change, of risk and reward, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world, and, in writing of her own life, we come to see the true connectedness of the Mother Tree that nurtures the forest in the profound ways that families and human societies do, and how these inseparable bonds enable all our survival.
