This survey of western architecture is divided into two parts. The first deals with the basic properties of architecture, examining a building's structure and aesthetic appeal. The second is a chronological survey of western architectural development from prehistoric times to the present.

A survey of Western architecture introduces the basics of building design and traces the history and development of Western architectural style from prehistoric times to the present

More than fifteen years after the success of the first edition, this sweeping introduction to the history of architecture in the United States is now a fully revised guide to the major developments that shaped the environment from the first Americans to the present, from the everyday vernacular to the high style of aspiration. Eleven chronologically organized chapters chart the social, cultural, and political forces that shaped the growth and development of American towns, cities, and suburbs, while providing full description, analysis, and interpretation of buildings and their architects. The second edition features an entirely new chapter detailing the green architecture movement and architectural trends in the 21st century. Further updates include an expanded section on Native American architecture and contemporary design by Native American architects, new discussions on architectural education and training, more examples of women architects and designers, and a thoroughly expanded glossary to help today's readers. The art program is expanded, including 640 black and white images and 62 new color images. Accessible and engaging, American Architecture continues to set the standard as a guide, study, and reference for those seeking to better understand the rich history of architecture in the United States.

And why did American buildings grow so tall in the last decades of the 19th century. This book explores the history of American architecture from prehistoric times to the present, explaining why characteristic architectural forms arose at particular times and in particular places.
