"James proposed at the iconic Empire Polo Fields of 'RACHELLA' Friday night... and I said YES! I'm over the Coachella moon," she wrote, inserting the star, cactus and moon emoji ...

A hung Parliament, terrorist bombs, sex trafficking and tabloid war... Welcome to London, 1885. In Victorian London, the age of consent was just thirteen. Girls from poor backgrounds were enticed, tricked and sold - sometimes by their own parents - into prostitution. From the city, if not already marked out for a wealthy gentleman in a discreet brothel, the girls were trafficked on to Brussels and to Paris. All the while, the Establishment turned a blind eye. That is, until one policeman wrote an incendiary report. Disgraced in the backwaters of Chelsea for testifying against a corrupt colleague, Irish inspector Jeremiah Minahan was already finding his integrity unwelcome to the Metropolitan Police. But particularly explosive among his findings at Mary Jeffries' local establishment was this fact: that her clients were none other than those with the power to change the situation - the peers and politicians themselves. With Minahan unceremoniously out of a job, and other radicals already campaigning for a change in the law, the forces were in place for a spectacular confrontation. What ensued was a courtroom battle, a sensational newspaper expose that set the nation alight, and a sweltering summer in which many encountered their demise...

"The authors have searched the Internet and World Wide Web and identified more than 700 sites across the K-12 curriculum"--p. 2.

Traces the history of the Volkswagen Beetle, from its first introduction as a Nazi propaganda tool and its postwar status as a countercultural icon to its successful revision in 1998.

This book is a printed edition of the Special Issue "Soft Tissue and Bone Sarcoma" that was published in Cancers

Fully revised and updated, the second edition of Introduction to Global Politics places an increased emphasis on the themes of continuity and change. It continues to explain global politics using an historical approach, firmly linking history with the events of today. By integrating theory and political practice at individual, state, and global levels, students are introduced to key developments in global politics, helping them make sense of major trends that are shaping our world. This is a highly illustrated textbook with informative and interactive boxed material throughout. Chapter opening timelines contextualise the material that follows, and definitions of key terms are provided in a glossary at the end of the book. Every chapter ends with student activities, cultural materials, and annotated suggestions for further reading that now include websites. Key updates for this edition: New chapter on 'The causes of war and the changing nature of violence in global politics' New chapter on 'Technology and global politics' Enhanced coverage of theory including post-positivist theories Uses 'levels of analysis' framework throughout the text New material on the financial crisis, BRIC and Iran Introduction to Global Politics continues to be essential reading for students of political science, global politics and international relations.

This work argues for the existence of a committee of 300, an elite body which controls every aspect of politics, religion, commerce and industry, answerable to no one except itself. It maintains that the confusion of social and moral values in the free world has been deliberately created.

Sometimes achieving big things requires the ability to think small. This simple concept was the driving force that propelled the Volkswagen Beetle to become an avatar of American-style freedom, a household brand, and a global icon. The VW Bug inspired the ad men of Madison Avenue, beguiled Woodstock Nation, and has recently been re-imagined for the hipster generation. And while today it is surely one of the most recognizable cars in the world, few of us know the compelling details of this car's story. In Thinking Small, journalist and cultural historian Andrea Hiott retraces the improbable journey of this little car that changed the world. Andrea Hiott's wide-ranging narrative stretches from the factory floors of Weimar Germany to the executive suites of today's automotive innovators, showing how a succession of artists and engineers shepherded the Beetle to market through periods of privation and war, reconstruction and recovery. Henry Ford's Model T may have revolutionized the American auto industry, but for years Europe remained a place where only the elite drove cars. That all changed with the advent of the Volkswagen, the product of a Nazi initiative to bring driving to the masses. But Hitler's concept of "the people's car" would soon take on new meaning. As Germany rebuilt from the rubble of World War II, a whole generation succumbed to the charms of the world's most huggable automobile. Indeed, the story of the Volkswagen is a story about people, and Hiott introduces us to the men who believed in it, built it, and sold it: Ferdinand Porsche, the visionary Austrian automobile designer whose futuristic dream of an affordable family vehicle was fatally compromised by his patron Adolf Hitler's monomaniacal drive toward war; Heinrich Nordhoff, the forward-thinking German industrialist whose management innovations made mass production of the Beetle a reality; and Bill Bernbach, the Jewish American advertising executive whose team of Madison Avenue mavericks dreamed up the legendary ad campaign that transformed the quintessential German compact into an outsize worldwide phenomenon. Thinking Small is the remarkable story of an automobile and an idea. Hatched in an age of darkness, the Beetle emerged into the light of a new era as a symbol of individuality and personal mobility—a triumph not of the will but of the imagination.

This book includes 9 projects on building smart and practical AI-based systems. These projects cover solutions to different domain-specific problems in healthcare, e-commerce and more. With this book, you will apply different machine learning and deep learning techniques and learn how to build your own intelligent applications for smart ...
