The London County Council now became involved again because legislative changes had made the LCC the planning authority to which the City of London had to apply for planning permission for any major development. Chamberlin Powell and Bon produced a more detailed scheme and the City used it as the basis for an exploratory planning application to the LCC. In June 1958 the LCC turned it down in ...

On 3 November 2007, the Royal Zoological Society of NSW held its annual forum, with the topic being The natural history of Sydney. It has remained as the title of this book. The program contained the following introduction as the theme of the forum and it has remained as the theme for this book: “Sydney has a unique natural history, providing a home for iconic animals and plants while remaining a global city. It captured the imagination of prominent naturalists and inspired visits and collecting trips to the infant colony of New South Wales in the late 1790s and early to late 1800s. From these collections flowed great descriptive works detailing the new and unusual animals and plants of the antipodes. Gould, Owen, Huxley, Peron, Banks and many others recounted new and evocative flora and fauna. Many collecting trips for the great museums and institutions in Europe began in Sydney. Sydney still continues to engage naturalists and those grappling with the current drama of climate change and conservation. The Royal Zoological Society of New South Wales, founded in Sydney in 1879, is a product of the grand 19th century tradition of natural history, with a particular emphasis on animal life. Sydney is also home to some of Australia’s oldest and finest institutions, such as the Australian Museum, the University of Sydney and the Royal Botanic Gardens. Throughout Sydney, there are places where the natural habitat has not been supplanted by urban growth, and the interest in Sydney’s endemic flora and fauna remains strong. This forum draws on a magnificent interdisciplinary vision while continuing to employ all the modern tools in the investigation and communication of Sydney’s natural history. It reflects a resurgence in local history and pursues the natural history of our harbour-side city in a modern framework.” The day of the forum was a captivating display of the diversity of the fauna of Sydney, both native and introduced, and its varied habitats, and of the diverse ways of appreciating natural history, including the history of natural history. Also on display was the depth of scholarship lying behind each of the presentations. The subject clearly has a profound hold on many professional biologists, historians and those keen to conserve their local area, but if the day is any guide, there are vastly more people living in or visiting Sydney who have more than a passing interest in this topic. The subject matter ranged from the history of institutions engaged in natural history, through animal groups as diverse as reptiles and cicadas, to ideas on how to see Sydney as a natural setting. Other papers dealt with the use by Aboriginal peopleof the native biota in terms of fishing and being displayed in rock paintings, before the arrival of the colonists. There is little doubt that this theme could run to 10 volumes, not just this one, but the diversity of ideas, skills and organisms displayed in this one book will serve as a guide to what lies beyond these pages. A considerable effort was made by each author to present their material as both interesting and accurate. The material is built on lifetimes of sustained effort to study, record and communicate findings and ideas. It is also built on the lifetime work of our predecessors, who laboured to find and record the natural history of Sydney. We are indebted to their efforts. This book records not only the outcome of a successful day of presentations, but more importantly the lifelong scholarship of those authors in each of the specialist fields. Not only have the authors been absorbed by documenting the biodiversity, they have included studies, or intelligent speculation, on the factors which have impacted on this diversity since Cook sailed along the NSW coast in 1770. The Macquarie Dictionary, e.g. the revised third edition, defines ‘natural history’ as ‘the science or study dealing with all objects in nature’, and ‘the aggregate of knowledge connected with such knowledge’. This makes natural history of wide interest to the entire community of Sydney, both residents and visitors. However, we have specialised to the extent that we have focused principally on fauna, the RZS being a zoological society. Nevertheless, plant communities are recognised as part and parcel of the natural history of Sydney, as is a sense of the geography of the city, with its magnificent harbour, sandstone backdrop and spectacular national parks surrounding the city. Also of great importance is how others in the past have seen the natural history of what is now called Sydney. All these ideas are captured in this book. One of the strengths of being a naturalist, i.e. ‘one who is versed in or devoted to natural history, especially a zoologist or botanist’ (Macquarie Dictionary), is the opportunity to look across the individual disciplines, be it a specialist in birds, mammals or polychaetes, a taxonomist, or an ecologist or writer. Their advantage is the ability to see the richness of a place such as Sydney. Consequently, most botanists and zoologists have one or two highly specialised skills, but a keen interest in the broader picture and can thus appreciate the importance of, for example, cave art or fish diversity in the harbour, and recognise that the vertebrate fauna of Sydney has changed over the 222 years since European settlement, and no doubt the invertebrate fauna has changed although it is less easily assessed. Our aim in this book is to draw attention to the natural history of Sydney for scholars, as well as those who have the task of looking after a particular area, such as within a local government area, or a particular taxon, such as reptiles or fish, and those who have the opportunity to conserve areas, taxa or institutions through their employment or legislative responsibilities. It is also for teachers and lecturers, colleagues in other cities and towns in Australia, and those with a keen interest in managing our urban wildlife, our cultural heritage or promoting the profound value of our natural heritage within a city landscape. It also displays the importance of museum and herbarium collections in documenting the changes since 1770.

"Willoughby City Council is fortunate to have a rich history of Aboriginal culture and heritage. The areas around Middle Harbour and Lane Cove River contain invaluable remnants of an ancient culture. This book presents an Aboriginal history of Willoughby from Creation prehistory, early contacts through to the present day. The publication also contains some fictional short stories, to help the reader see situations through the eyes of the Aboriginal people. The publication also includes quotes from Aboriginal women obtained through interviews for the purpose of inclusion in this project."--Provided by publisher.

Here, in a single convenient volume, is the essential reference book for anyone with an interest in British history. First published in 1997, under the editorship of the late John Cannon and in consultation with over 100 distinguished contributors, this Companion has now been updated by Robert Crowcroft to include the very latest scholarship and research. It describes and analyses the people and events that have shaped and defined life in Britain over more than 2,000 years of political, social, and cultural change, encompassing topics as diverse as the War of the Roses, the Blitz, Stonehenge, Henry VIII, the suffragettes, the industrial revolution, the NHS, the Suez Crisis, the TUC, and the Afghan campaign. Over 4,500 entries provide a wealth of fact and insight on all aspects of the subject and from a variety of perspectives, including social, political, military, cultural, economic, scientific, and feminist. Entries cover not only monarchs, battles, and political events, but also the wider aspects of British history over the centuries. New entries on topics such as alternative vote, the 2008 financial crisis, Olympics in Britain, and the Scottish Independence Referendum, and UKIP ensure that the Companion remains relevant and current. Useful appendices include maps and genealogies, as well as a subject index. Coverage includes authors, composers and musicians, legal and technical terms, newspapers and periodicals, ranks and orders, sport and leisure, and scholarship and education. For those who like to explore history on the ground, there are also entries on individual counties, cathedrals, and churches, palaces and royal residences, and a range of other sites of historical significance. As well as providing reliable factual information, the Companion also offers detailed interpretation and analysis, giving readers a sense of how events and personalities relate to each other, whilst its multi-disciplinary approach places topics in a wide context. Whether you need to check the date of the Peasants' Revolt, understand what happened at the Battle of Imphal, find out about the history of maypoles, or compare the careers of successive Princes of Wales, The Oxford Companion to British History is a book no home reference shelf should be without.

This authoritative Companion introduces readers to the developments that lead to Britain becoming a great world power, the leading European imperial state, and, at the same time, the most economically and socially advanced, politically liberal and religiously tolerant nation in Europe. Covers political, social, cultural, economic and religious history. Written by an international team of experts. Examines Britain's position from the perspective of other European nations.

Public budgeting structure, process, legal framework and policywith examples from industrialized and developing countries Public Budgeting in Context examines budgeting at alllevels of U.S. government—federal, state, and local—andin a sample of governments around the world. The book assesses thecontext of public budgeting in these governments, especially thelegal foundations for its practice and how the process and finalbudgets are impacted by governance structures, laws, various budgetactors and different branches of government.
