Windows SharePoint Services (WSS) comes with Windows server and you don't have to pay separately. WSS is not a portal but it is only a collaborative platform as there is no publishing feature in WSS. But still this is a good choice for small companies.

~~Windows SharePoint Services 3.0 Help – Techyv.com~~

Microsoft Windows SharePoint Services 3.0 provides security features that you as a site owner can use to help control access to and authorization on your sites. By using these security features, site owners — instead of server administrators — control who can access the site, and site owners specify what permissions are assigned to users for particular entities.
