Using Science to Improve the
BLM Wild Horse and Burro
Program: A Way Forward

Read Book World

Population Growth Lab

Investigation 10 Answers
reviews the science that underpins the Bureau of Land Management's oversight of free-ranging horses and burros on federal public lands in the western United States, concluding that constructive changes could

Read Book World

Population Growth Lab

Investigation 19 Answers

be implemented. The Wild Horse and Burro Program has not used scientifically rigorous methods to estimate the population sizes of horses and burros, to model the effects of management actions on the animals, or

Read Book World

Population Growth Lab

to assess the availability and use of forage on rangelands. Evidence suggests that horse populations are growing by 15 to 20 percent each year, a level that is unsustainable for

Read Book World

Population Growth Lab

maintaining healthy horse populations as well as healthy ecosystems.

Promising fertility-control methods are available to help limit this population growth, however. In addition, science-based
