Earthworms are made up of many ridged segments. They are covered in minute hairs, which allow them

Where To Download

to grip the soil and move. They usually live in the soil's top few centimetres, but will burrow deeper to find essential moisture if the earth dries out or freezes.

Worms are vital in maintaining soil structure and fertility as they aerate the soil,

An earthworm is a terrestrial invertebrate that belongs to the order Opisthopora. They exhibit a tube-within-a-tube body plan, are externally segmented with corresponding internal segmentation, and usually have setae on all segments.

Where To Download

They occur worldwide where soil, water, and temperature allow. Earthworms are commonly found in soil, eating a wide variety of organic matter. This organic matter includes plant matter, living protozoa, rotifers, nematodes,
